OIIE Use Case Development Process

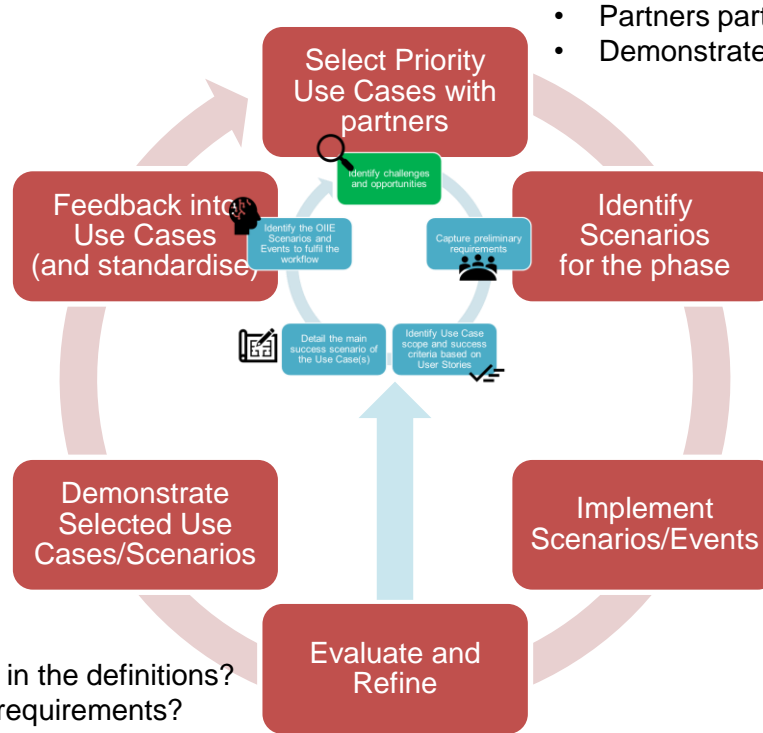

OIE Use Case Piloting Process

- Gap Analysis
- Identify Future Priorities
- ISO 18101

- Participants execute Use Cases
- Live @ Conferences and/or Published Recording
- Build awareness of capability

- Are there issues in the definitions?
- Is it fulfilling the requirements?

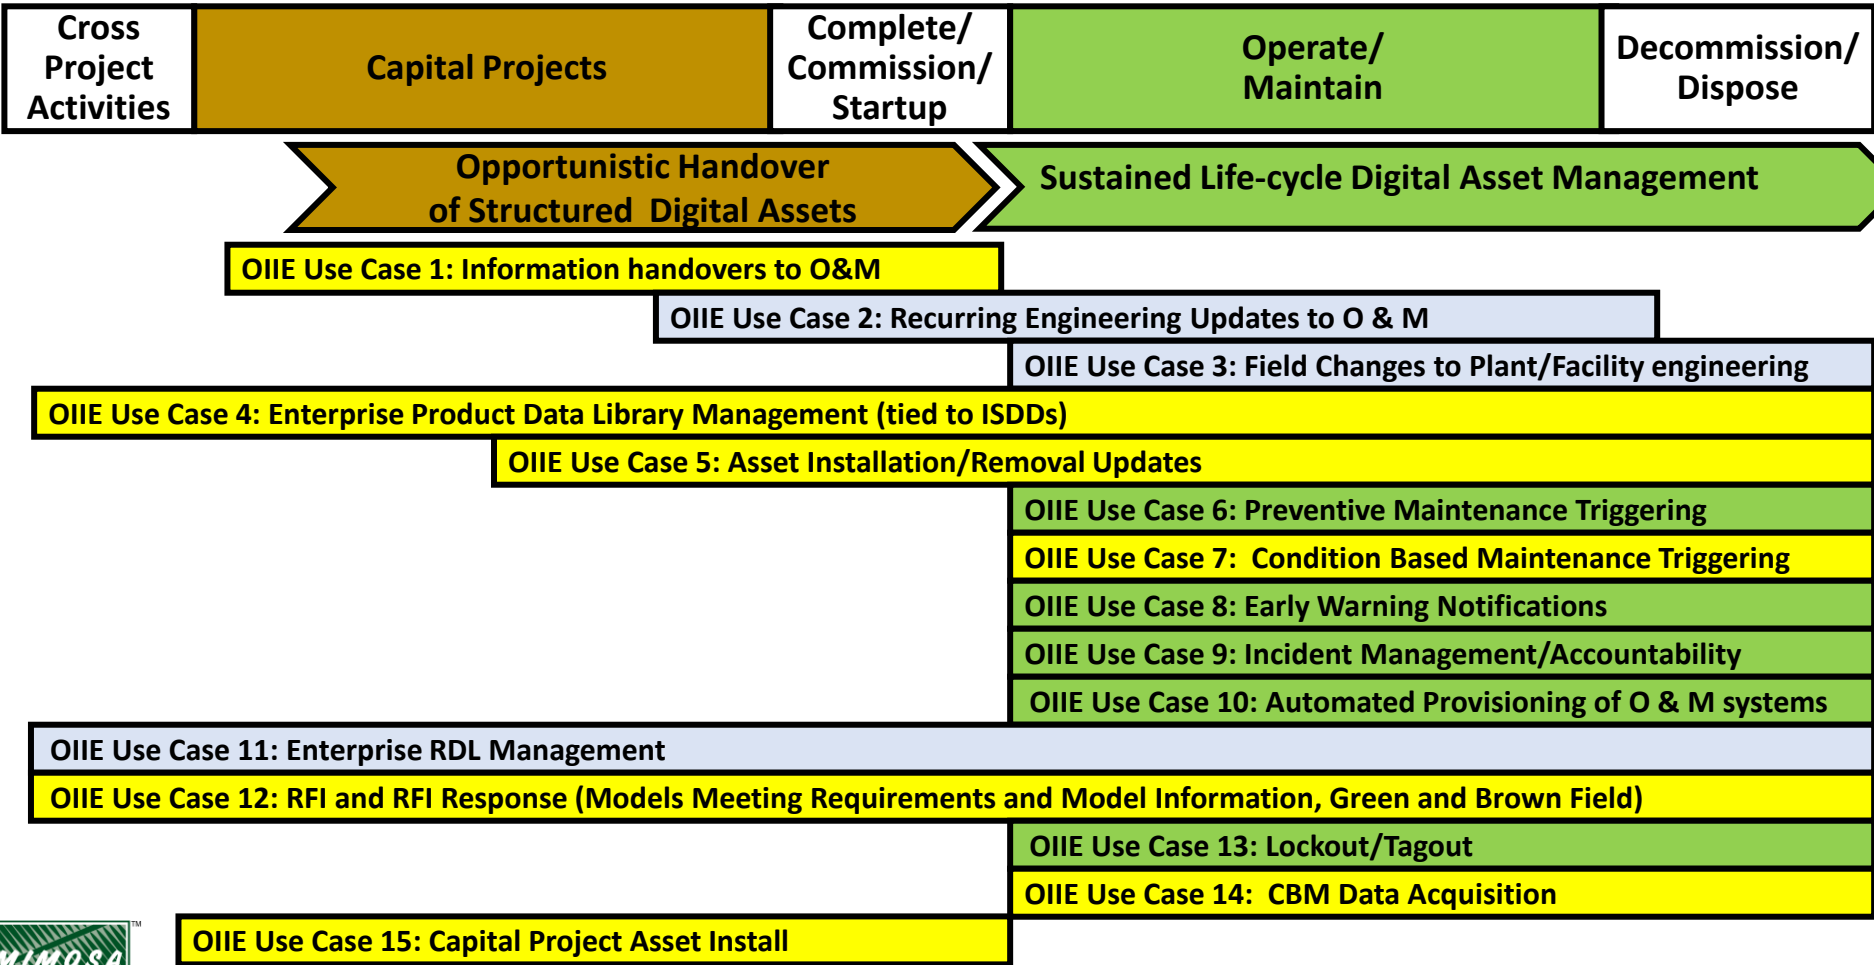

- Partners participate in pilot
- Demonstrate business and industry value

- Choose specific scenarios for implementation and demonstration given:
- Time, scope, resource constraints

May include any or all of:

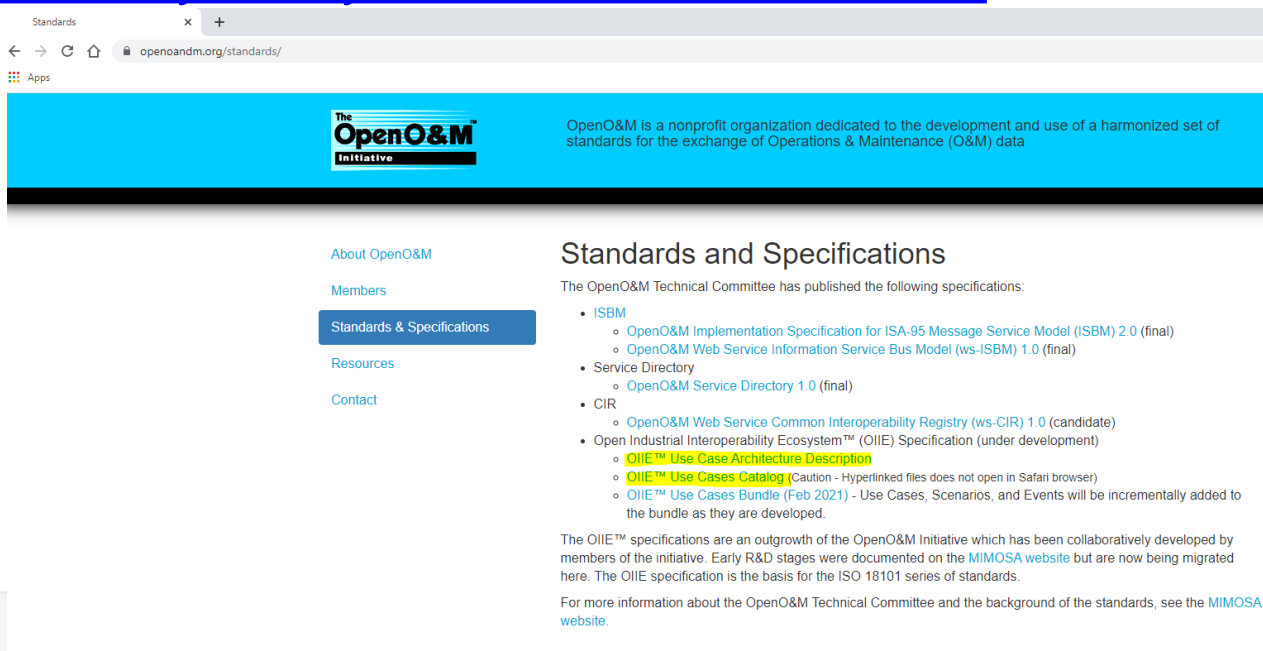

- Data set creation
- Data mappings
- Message mappings
- Adapter Implementation
- Message Flows and triggering
- Partner/Business Specific Processing
- Infrastructure Configuration, a.k.a. Ecosystem Administration

OIIE Use Cases

Resources

- Visit openoandm.org/standards/ and [mimosa.org/open-industrial-
interoperability-ecosystem-oiie/oiie-use-cases/](https://mimosa.org/open-industrial-interoperability-ecosystem-oiie/oiie-use-cases/)

The screenshot shows a web browser window with the URL openoandm.org/standards/. The page features a blue header with the OpenO&M logo and a navigation menu on the left. The main content area is titled "Standards and Specifications" and lists several technical specifications published by the OpenO&M Technical Committee.

The OpenO&M Initiative

OpenO&M is a nonprofit organization dedicated to the development and use of a harmonized set of standards for the exchange of Operations & Maintenance (O&M) data

Standards and Specifications

The OpenO&M Technical Committee has published the following specifications:

- ISBM
 - OpenO&M Implementation Specification for ISA-95 Message Service Model (ISBM) 2.0 (final)
 - OpenO&M Web Service Information Service Bus Model (ws-ISBM) 1.0 (final)
- Service Directory
 - OpenO&M Service Directory 1.0 (final)
- CIR
 - OpenO&M Web Service Common Interoperability Registry (ws-CIR) 1.0 (candidate)
- Open Industrial Interoperability Ecosystem™ (OIIE) Specification (under development)
 - [OIIE™ Use Case Architecture Description](#)
 - [OIIE™ Use Cases Catalog](#) (Caution - Hyperlinked files does not open in Safari browser)
 - [OIIE™ Use Cases Bundle \(Feb 2021\)](#) - Use Cases, Scenarios, and Events will be incrementally added to the bundle as they are developed.

The OIIE™ specifications are an outgrowth of the OpenO&M Initiative which has been collaboratively developed by members of the initiative. Early R&D stages were documented on the [MIMOSA website](#) but are now being migrated here. The OIIE specification is the basis for the ISO 18101 series of standards.

For more information about the OpenO&M Technical Committee and the background of the standards, see the [MIMOSA website](#).
