

# Using the AIN to Enable Digital Interoperability

Leveraging industry standards to build Digital Business Ecosystems

Mark Pyatt, SAP O&G Operational Integrity  
November, 2017

# Agenda

- Understanding the AIN
- How is BP Using the AIN?
- Understanding Digitalization and Interoperability Using the OIIE
- Questions / Next Steps

Enterprise Interoperability  
and  
Digital Transformation

# O&G Operators aim for the following...

**Maximize asset productivity**

Overall equipment **effectiveness**

---

**Return** on assets

---

Unplanned **outages**

---

**Drive safe operations**

Annual **OSHA** related **incidents**

---

Recordable **accident frequency rate**

---

**Reduce costs**

Annual service and maintenance **cost**

---

**Planned** maintenance budget vs. actual cost

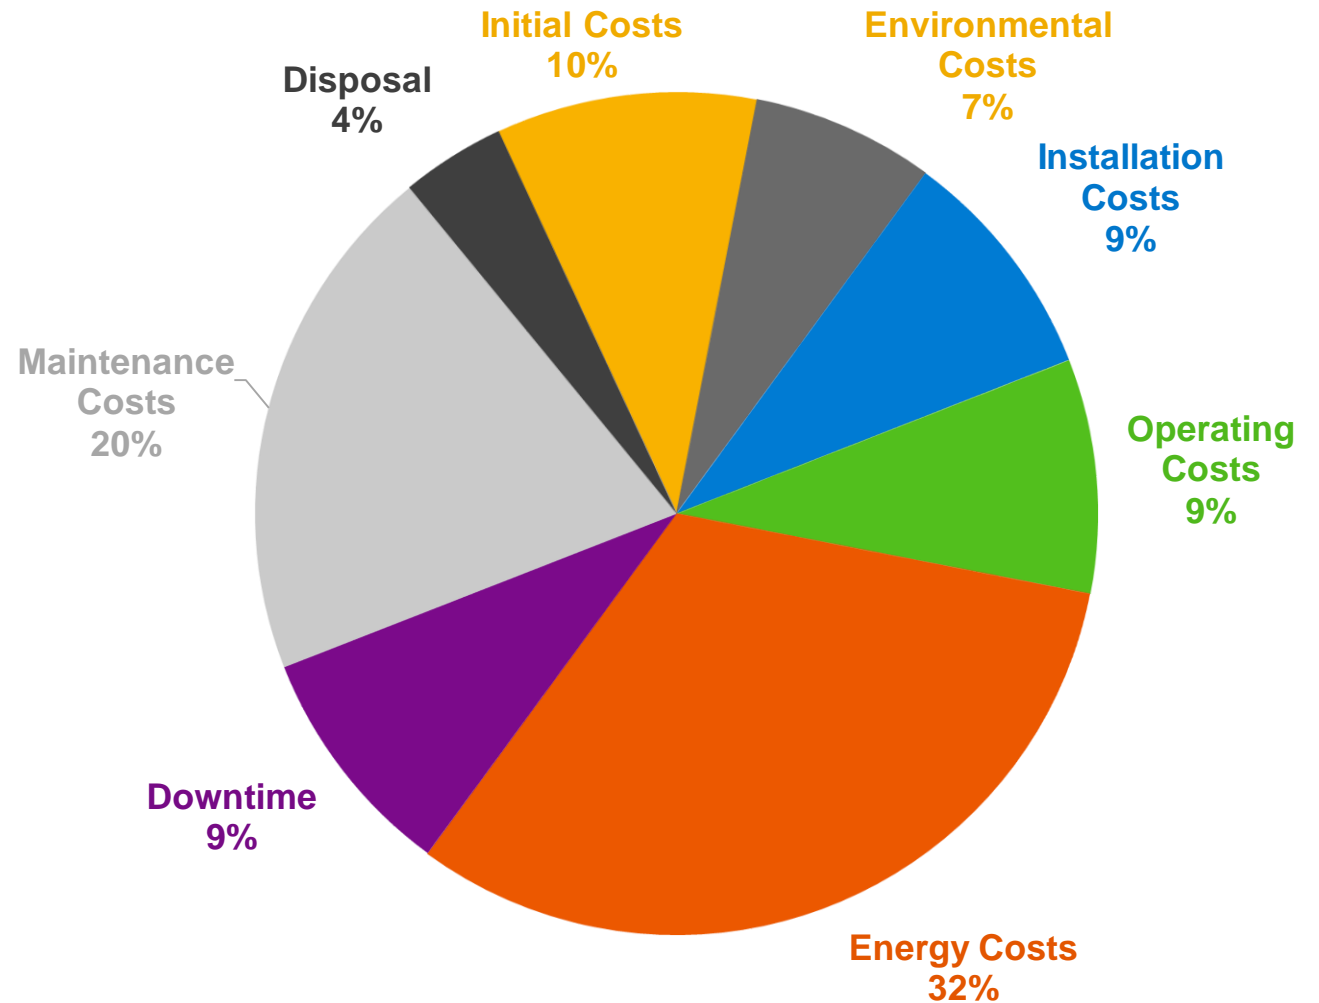

---

# ... but face different challenges in Asset Management

## Incompleteness

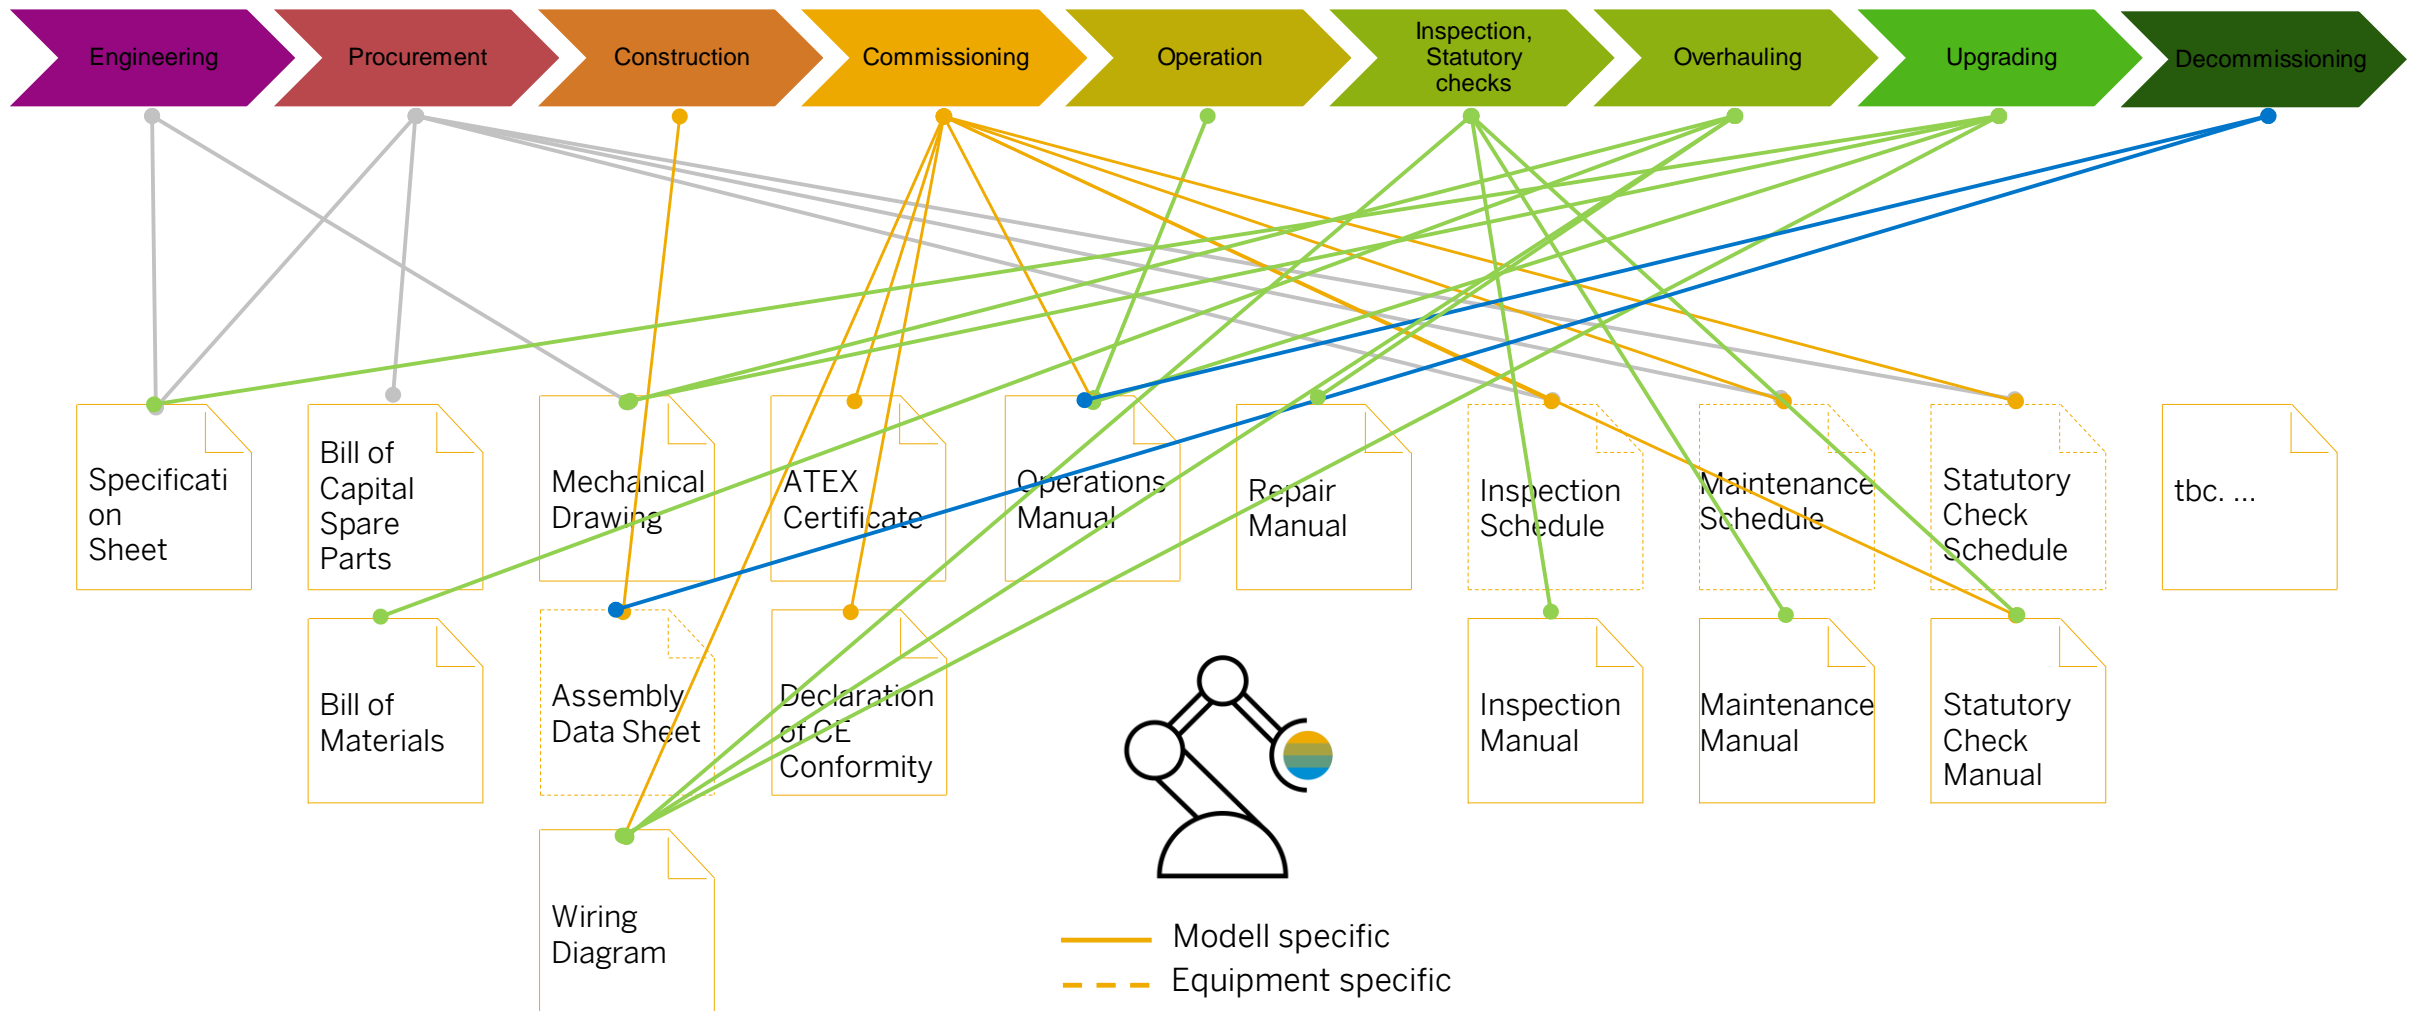

**Old** Vastness Uncertainty  
documentation Inconsistency  
Data Quality Incorrectness  
silos sources  
Manual data transfer

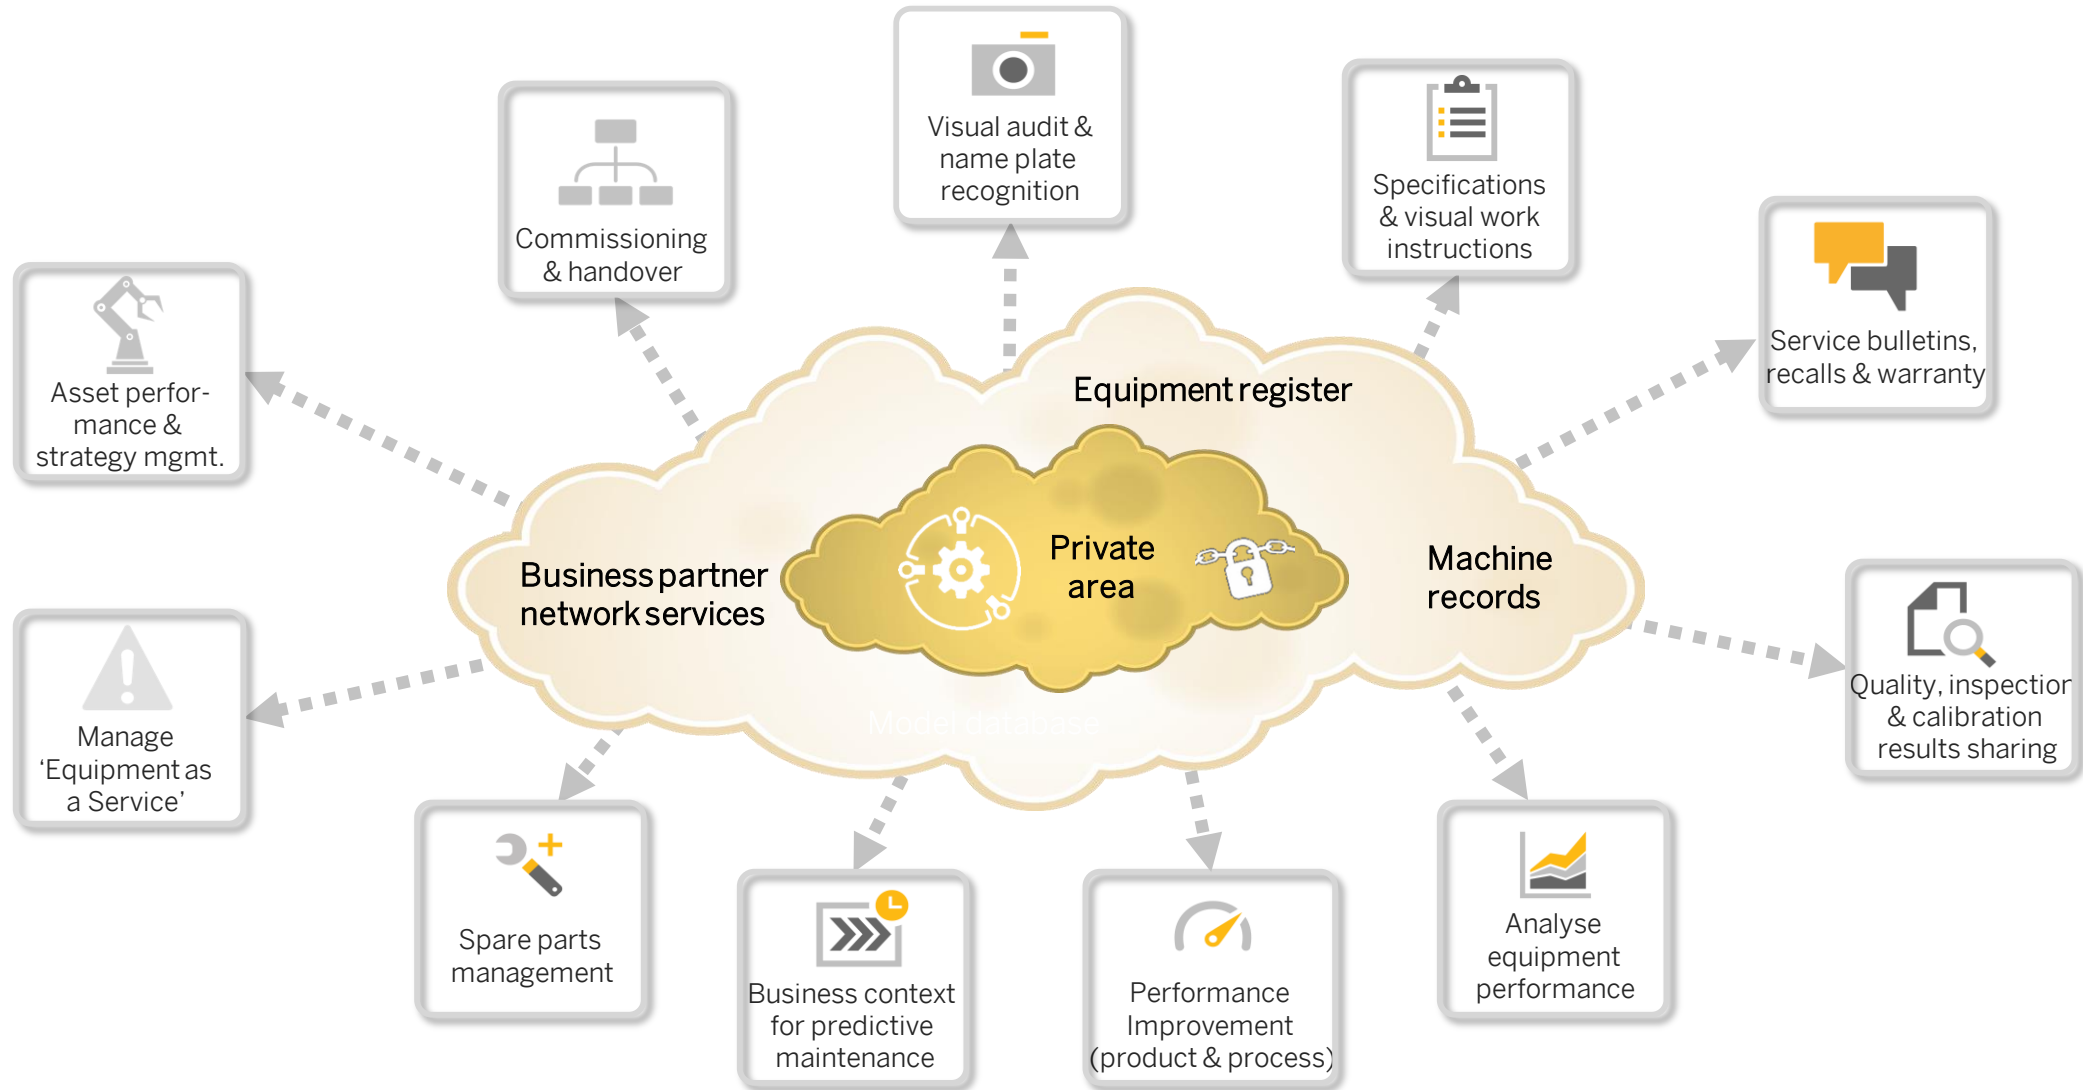

\*www.pumpsandsystems.com

# Asset specific documentation is complex and difficult to manage

Digital manufacturing information for all stakeholders

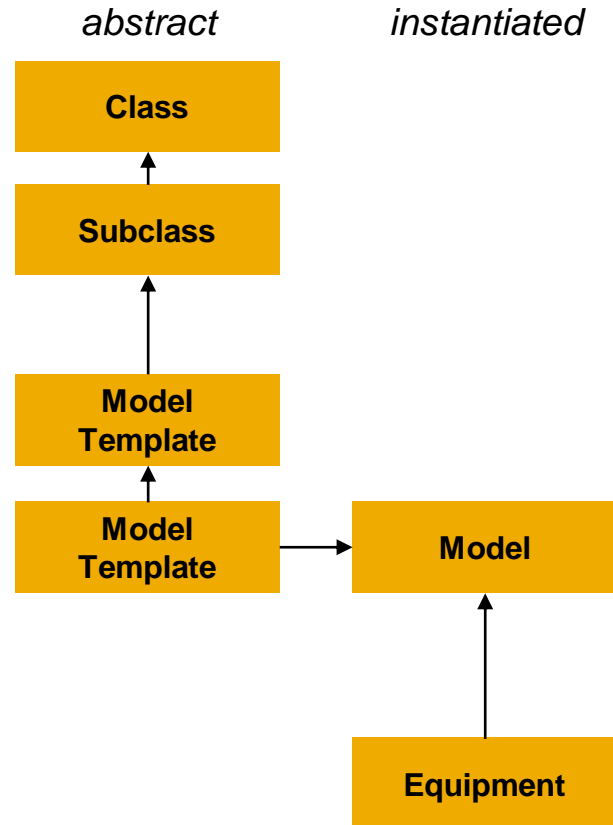

# SAP AIN Enables You to 'Rethink Technology Architecture'

# Standardize Asset Information Models; Create a Digital Twin

Business Semantic used to organize and share data between different parties

**Predefined Content** – provided and kept up to date by **SAP** as the AIN application provider. Based on common best practices (e.g. ISO 14224, API 610 data sheets). This is the **class** and **characteristics template**.

CLASS: PUMP  
 SUBCLASS: CENTRIFUGAL  
 RATED POWER (BHP)  
 EFFICIENCY %

**Model Family & Model Information**

provided by the individual **manufacturer** or **OEM**

FAMILY: 384 - PUMP ASSEMBLY, SEAWATER  
 MODEL: 384XL – PUMP ASSEMBLY, SEAWATER, EXTRA LARGE  
 Manufacturer: ACME Instruments  
 RATED POWER: 1500RPM – 2500RPM

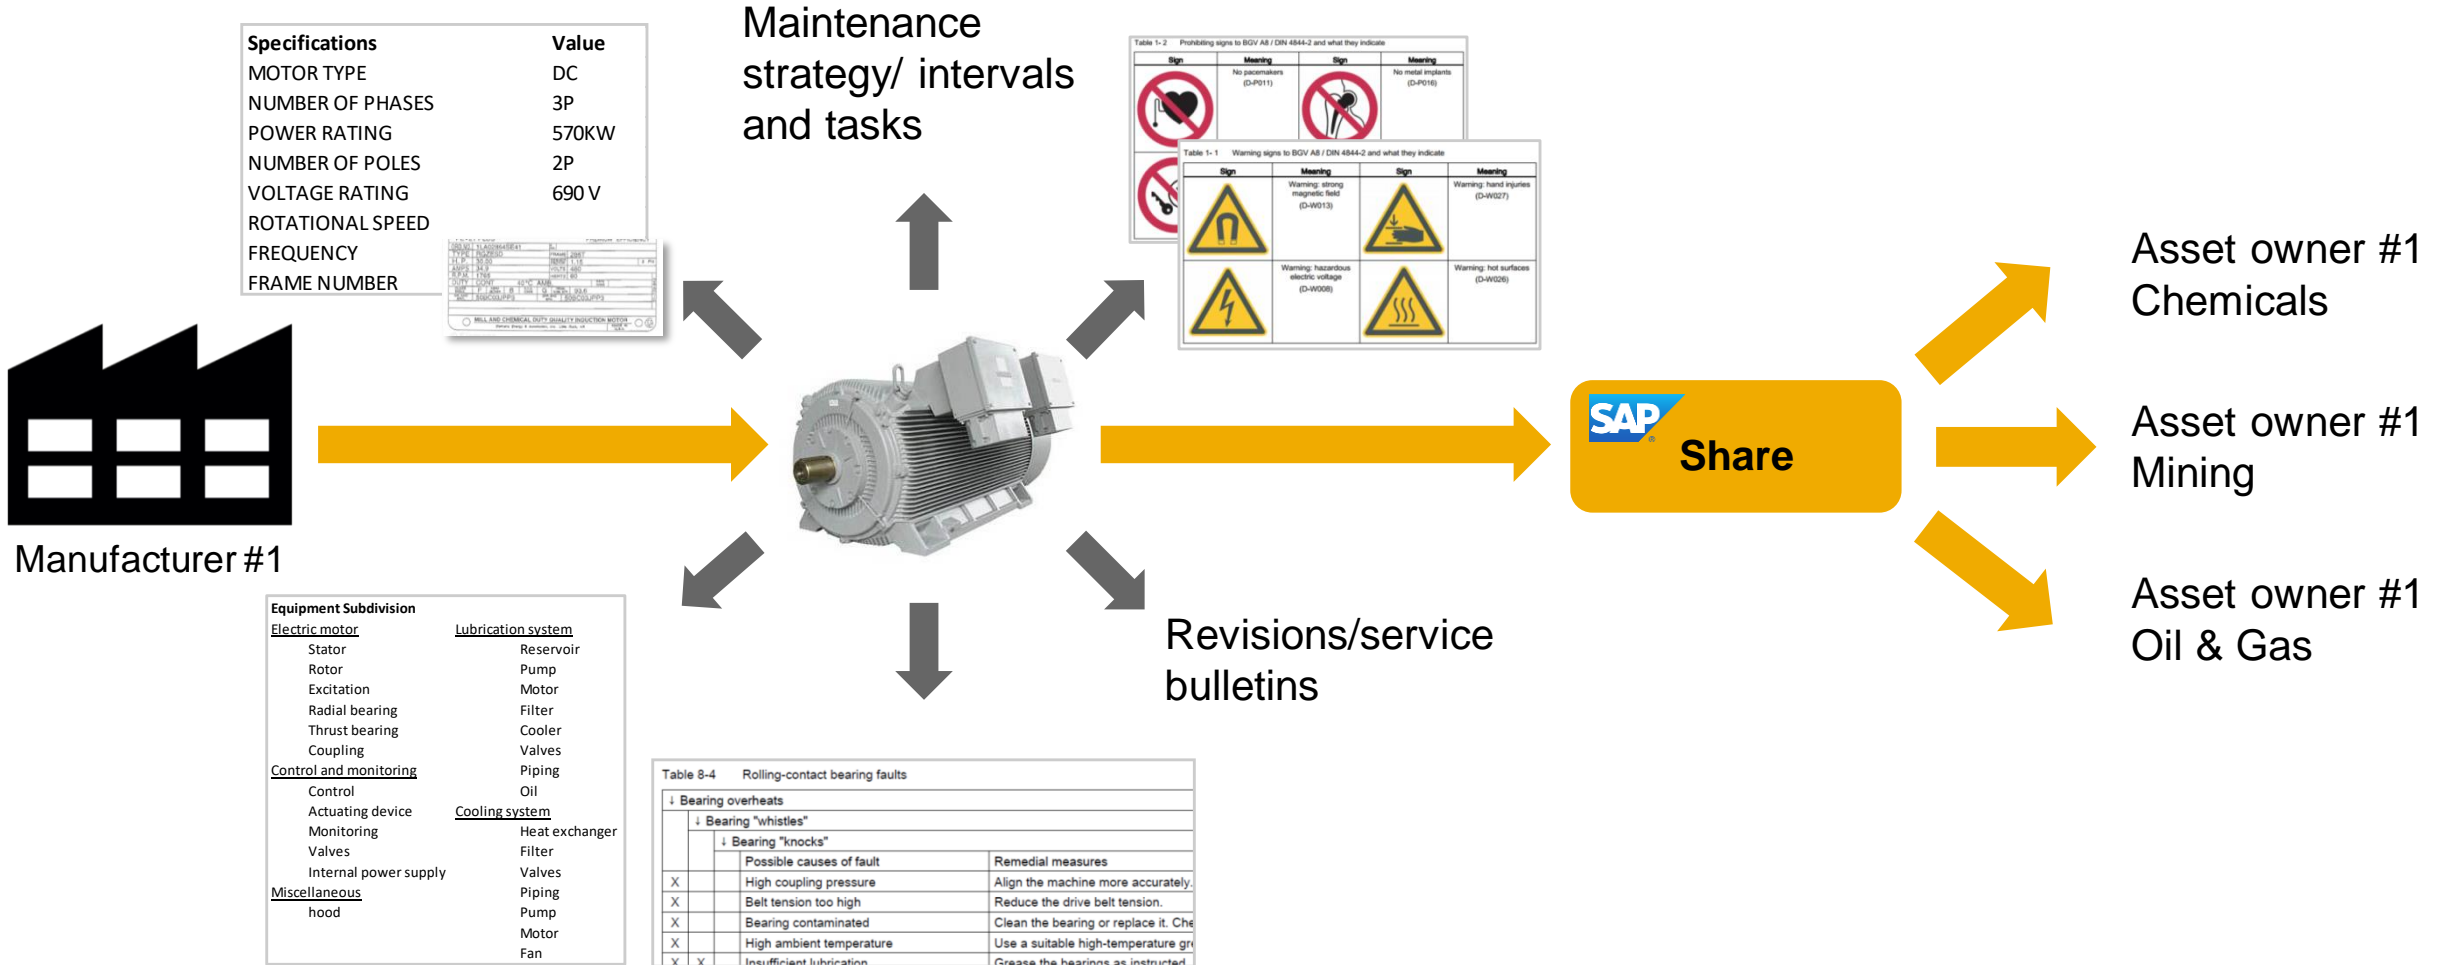

**Equipment/Asset Information** – provided by **Owner/Operator** or by the EPC (on behalf of the OEM).

EQUIP: PU815 – JETTY PUMP ASSEMBLY  
 Site Data: Dusty Environment,  
 Liquid: Pumping water  
 Service: Continuous

AIN Supports SAP and Non-SAP Information Models

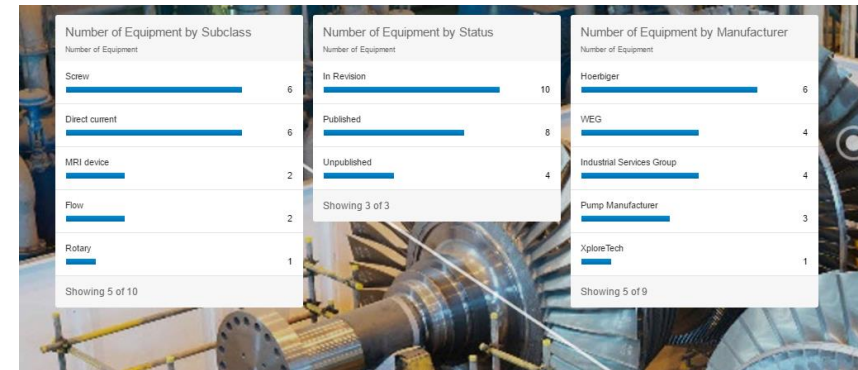

# Multi-tenancy capabilities support many data sources and formats found within your ecosystem

# SAP Asset Intelligence Network UI is flexible, adaptable

Real-time updates for equipment, specifications, catalog and part numbers for SAP PM

**Equipment** | [Publish](#) | [View Last Published](#) | [Delete](#) | [Edit Header](#)

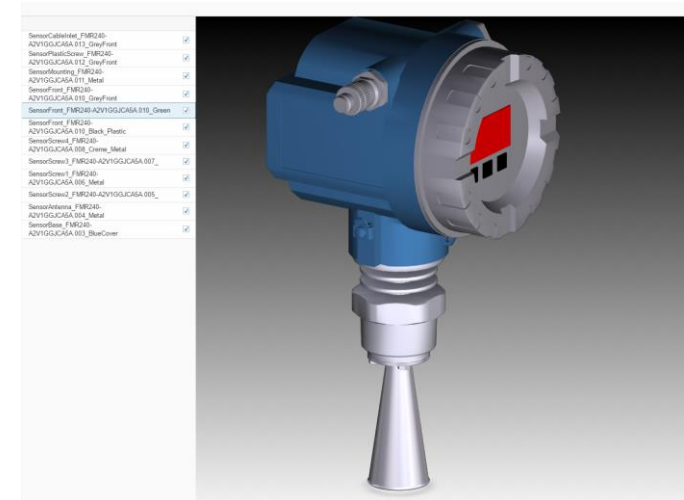

**NorthSea Rig1\_Flow 1038**  
Color Mixing\_Processing Plant Flow Meter

**Model:** Promag-D-400-5D4C  
**Manufacturer:** Endress+Hauser

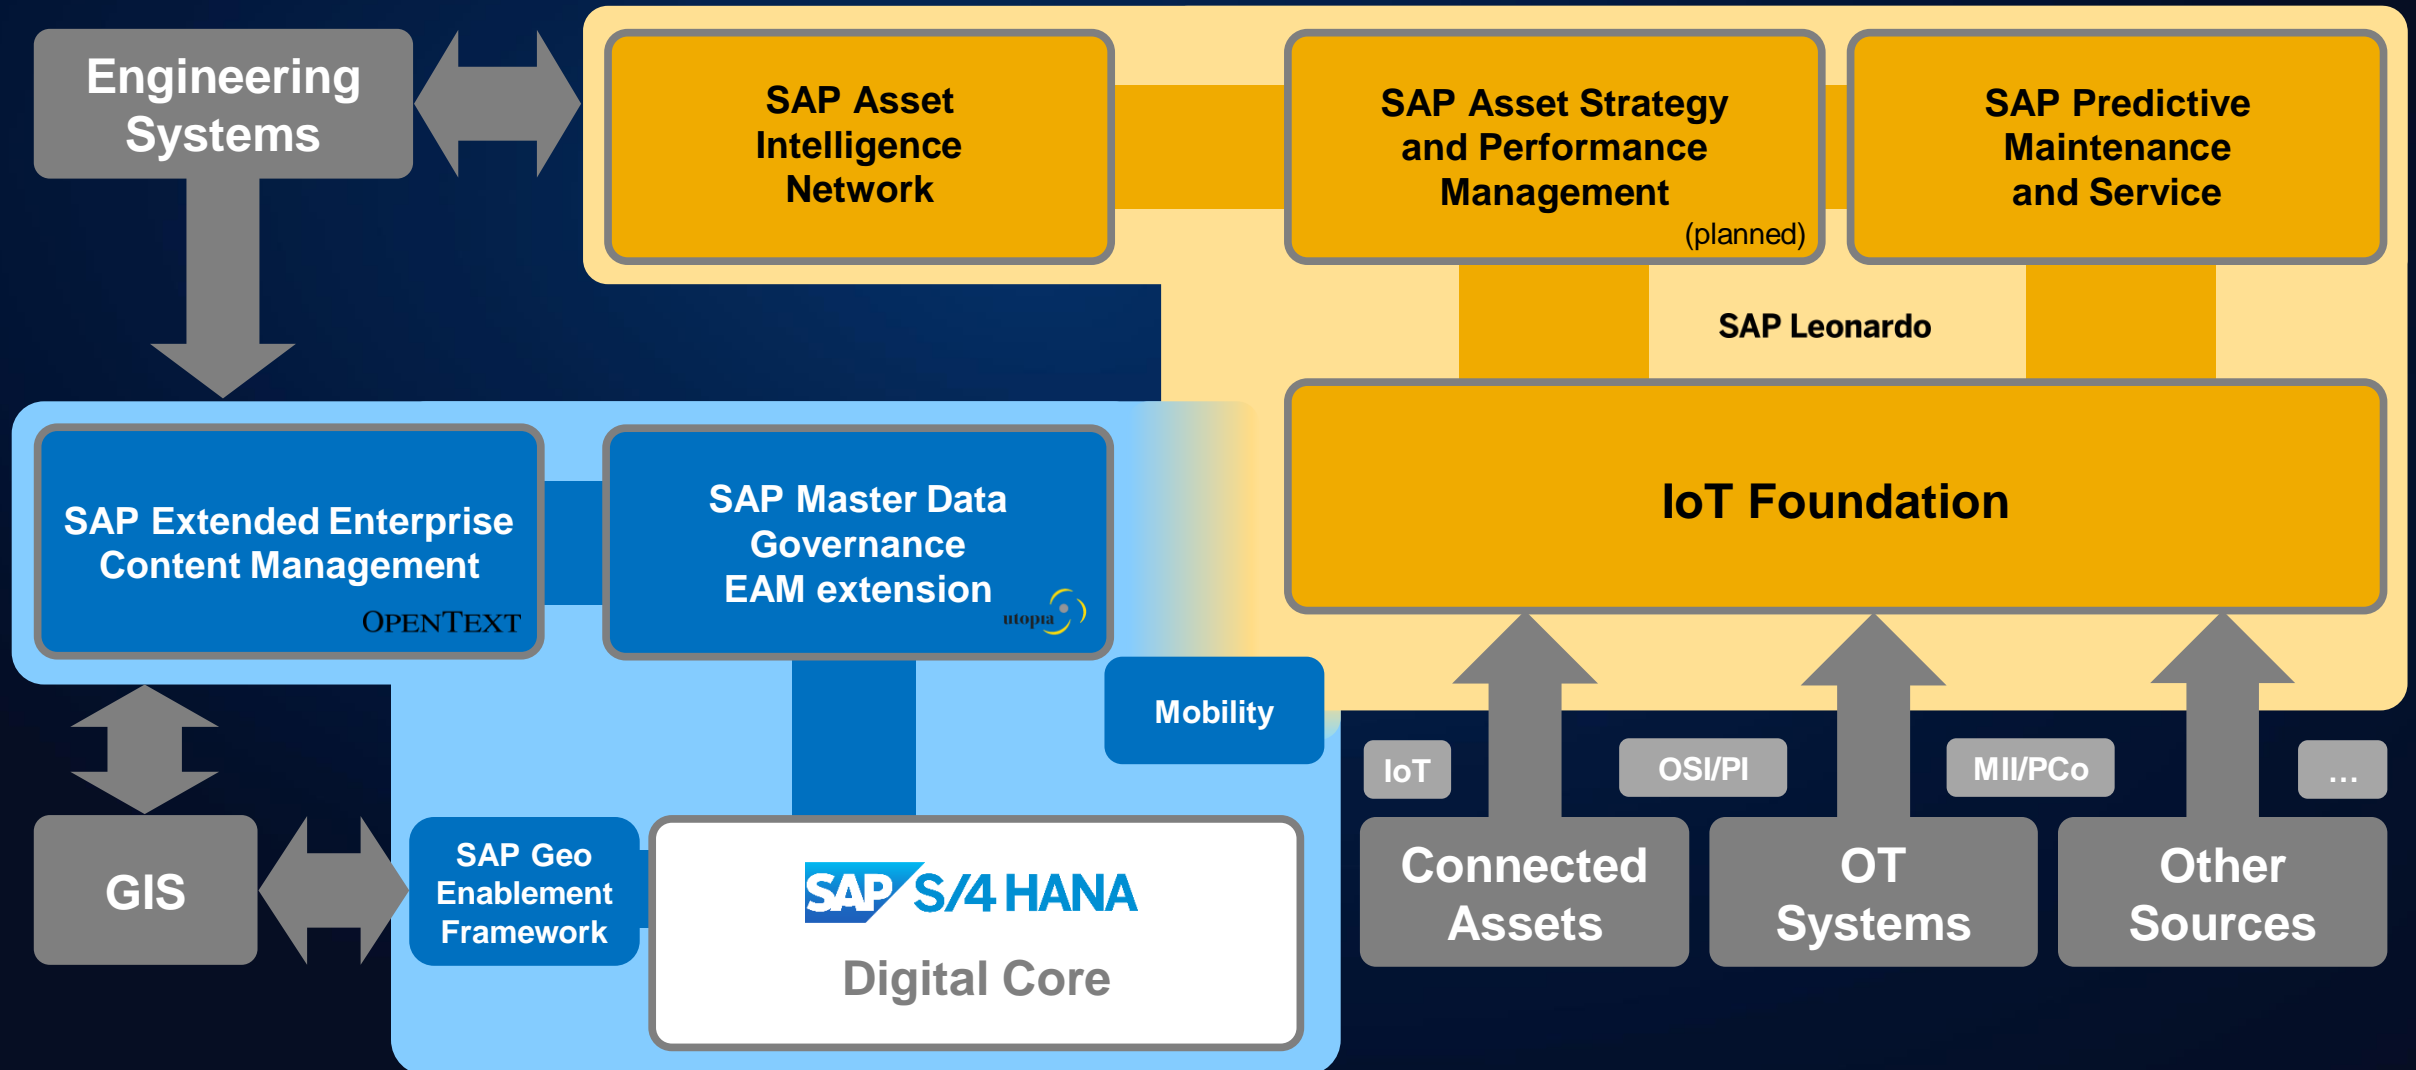

**Completeness:** 37%  
**Status:** In Revision  
**Equipment Phase:** Actual

**Published On:** Oct 6, 2016

# Logical Architecture for Asset Management System and Product View

# Agenda

- Understanding the AIN
- How is BP Using the AIN?
- Understanding Digitalization and Interoperability Using the OIIE
- Questions / Next Steps

Enterprise Interoperability  
and  
Digital Transformation

# What's the status on adoption of the Asset Intelligence Network?

## SAP Pilot Participants (2016):

Shell Oil / Endress Hauser

BASF / Sigma-Aldrich

Rio Tinto / Metso

Others...

## 2017 POCs (not a complete list):

Siemens	Conglomerates
Pfizer	BioPharmaceuticals
Bayer Group	BioPharma / Chemicals
ThyssenKrupp	Conglomerates
....	

## OIIE\* Pilot Participants:

BP / Yokogawa, TechnipFMC

## Future Pilots (MIMOSA / Fiotech Members):

Caterpillar

Chevron

DOW Chemical

Southern Company

U.S. Armed Forces

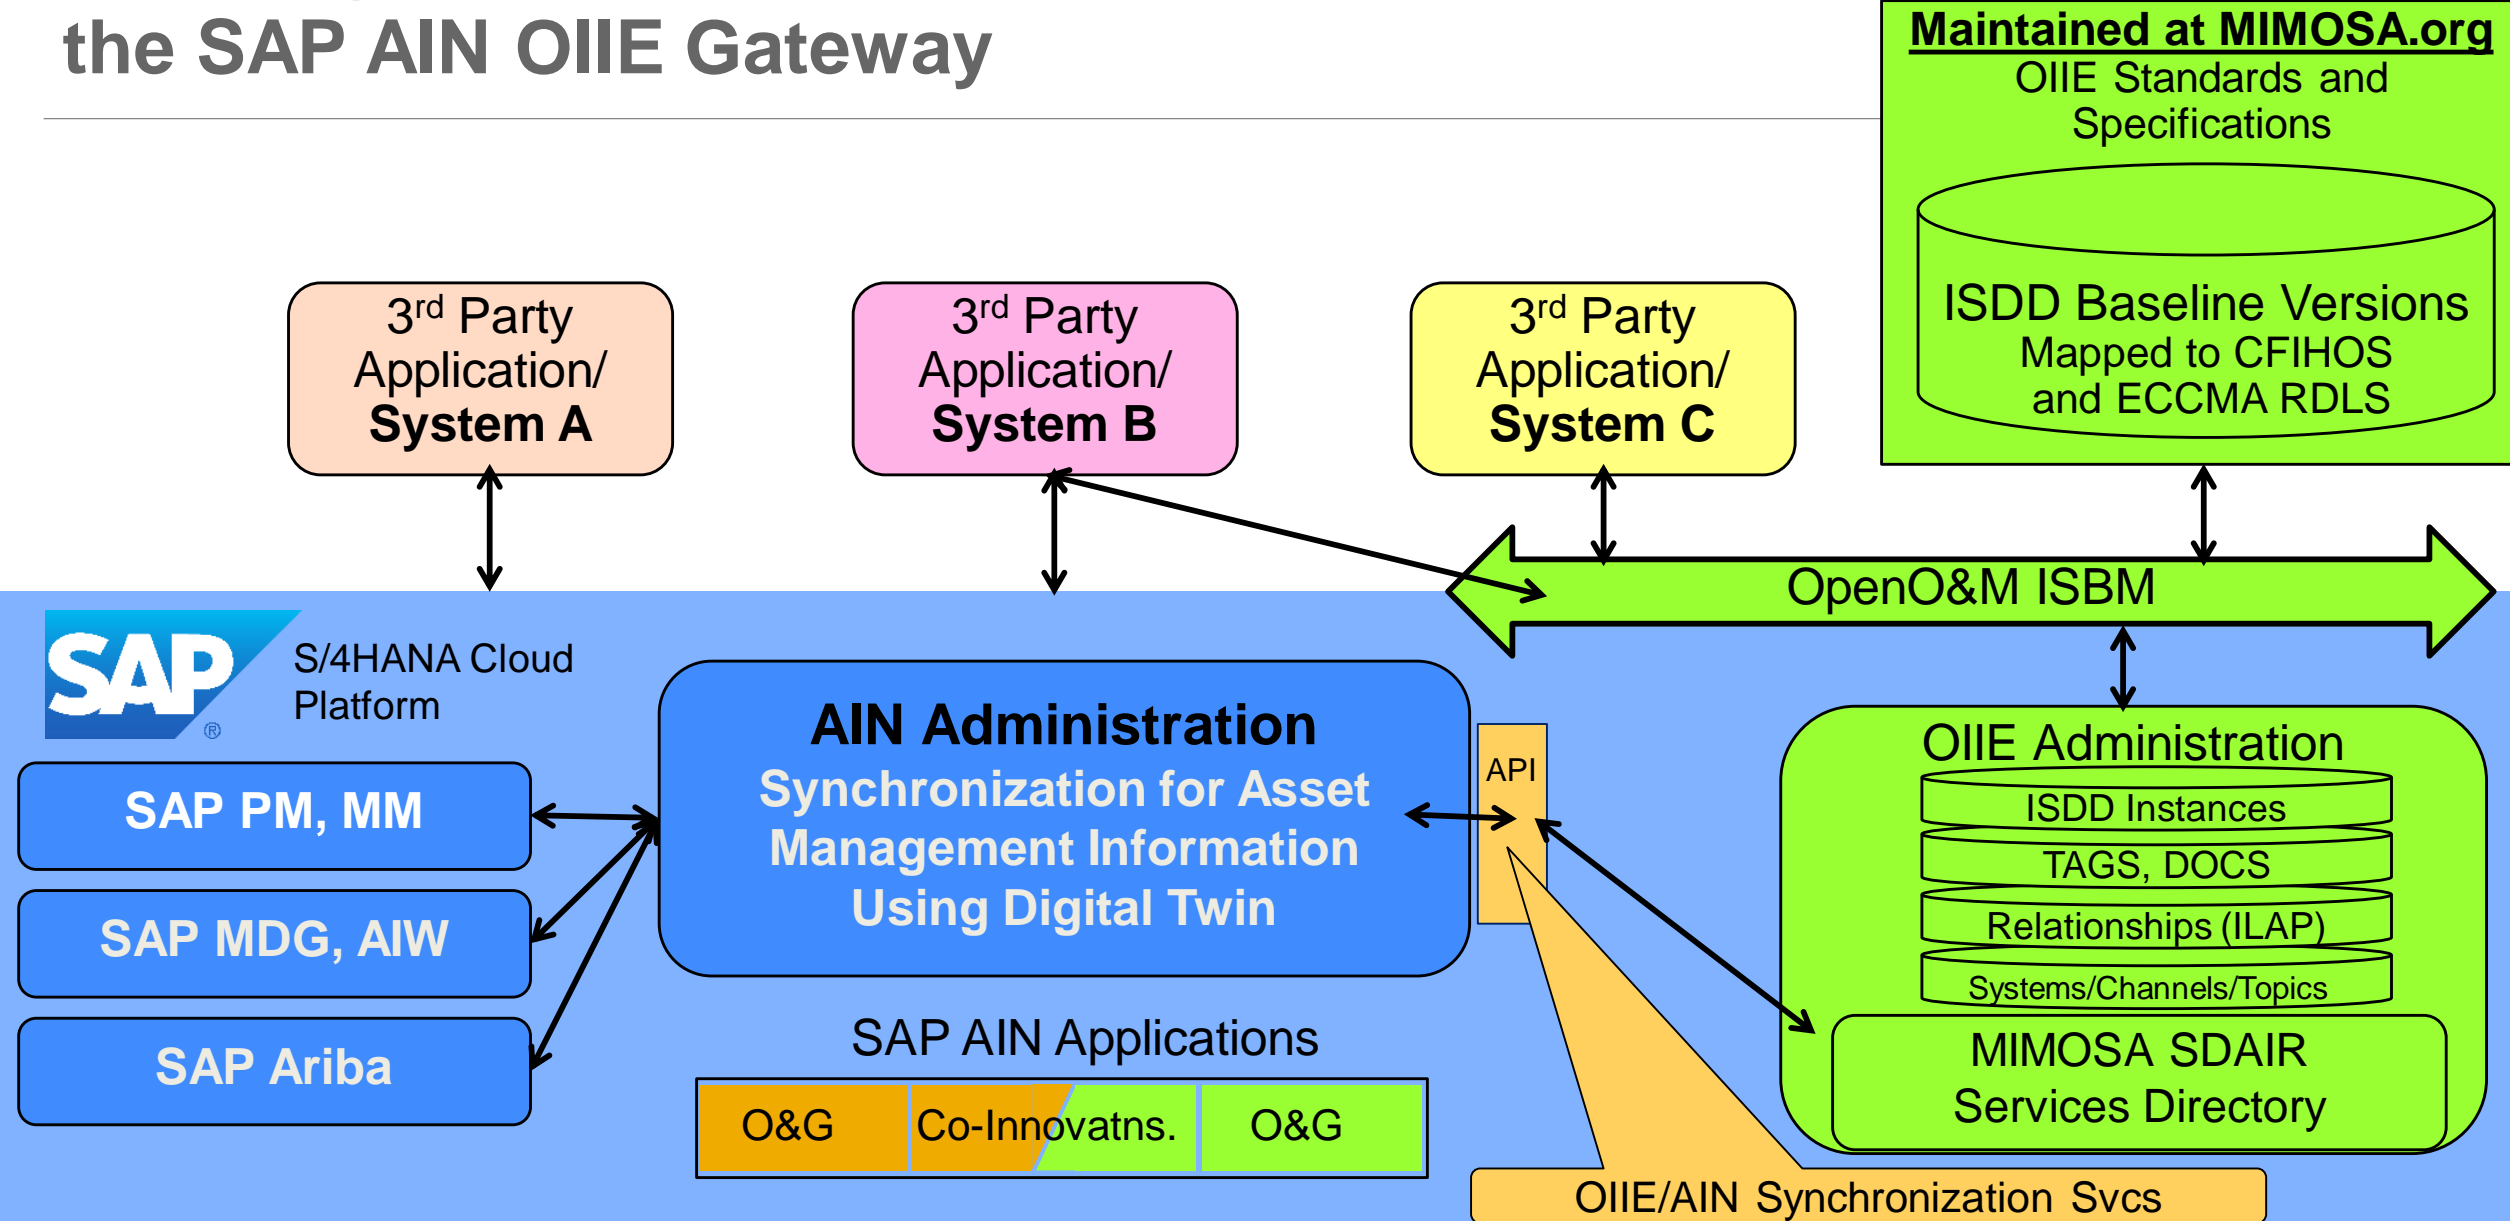

....

**40+ Companies  
on the list**

\* **OIIE** = *Open Industrial Interoperability Ecosystem*

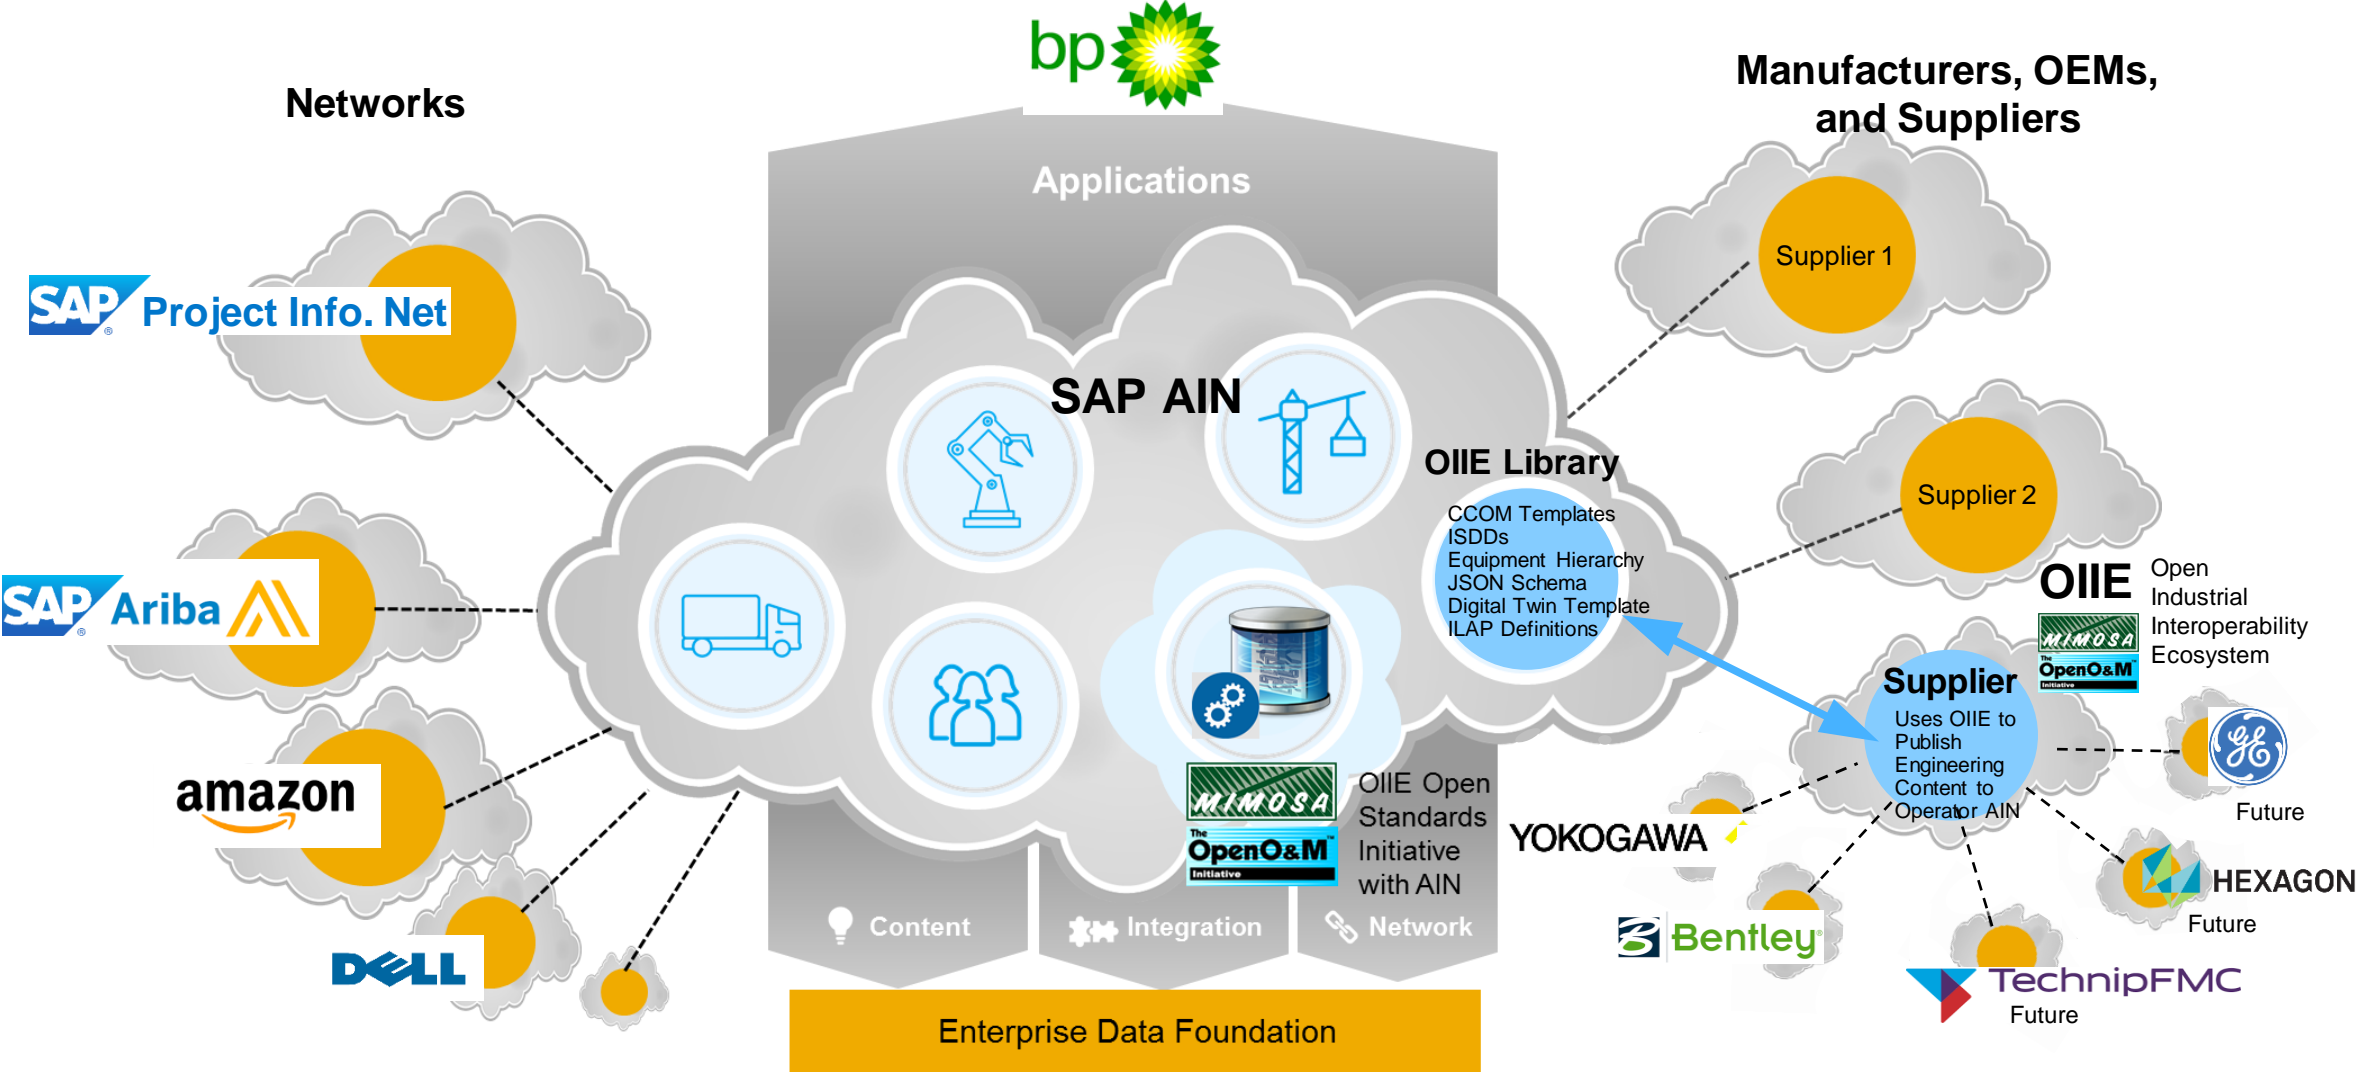

# Enabling asset lifecycle business processes via the SAP AIN OIIE Gateway

# Starting: OIIE Proof-of-Concept with Yokogawa, TechnipFMC

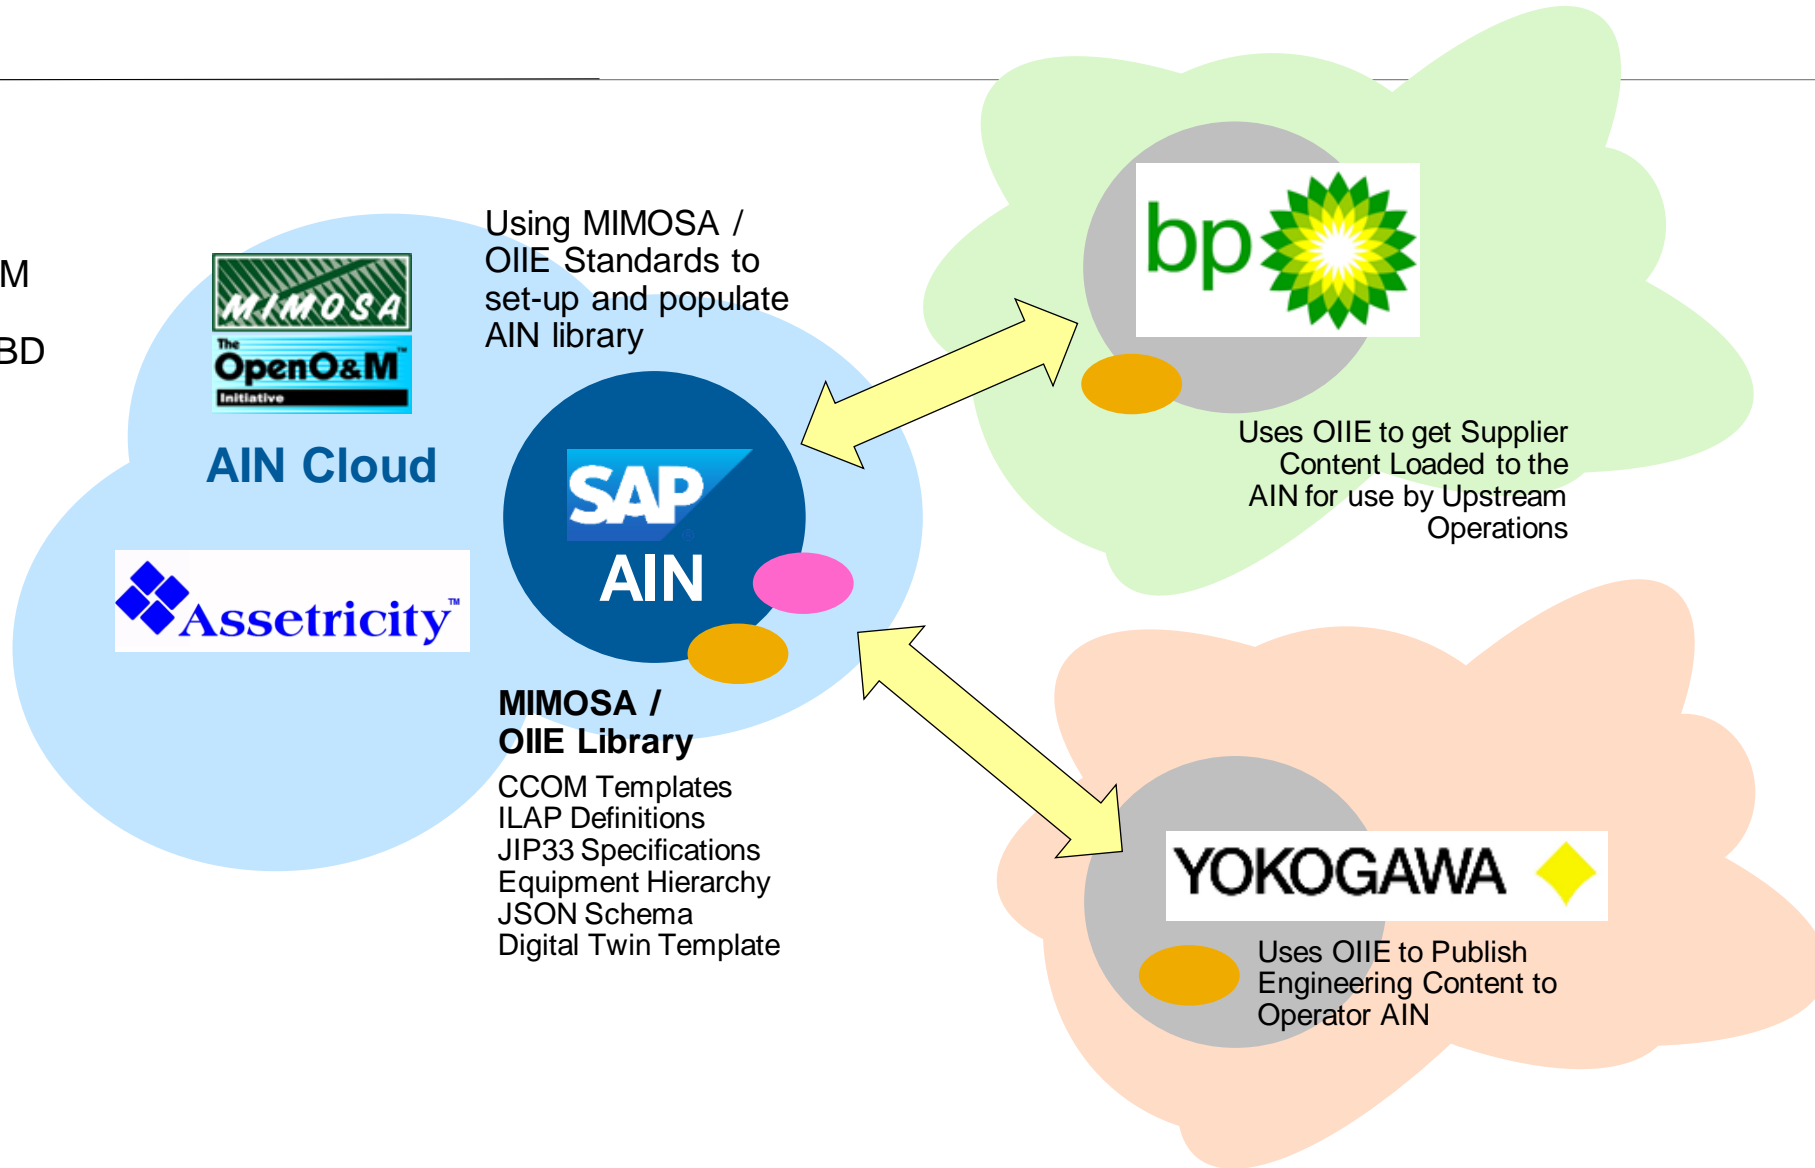

# Enabling: OIIE Proof-of-Concept to Test / Initiate Transactions

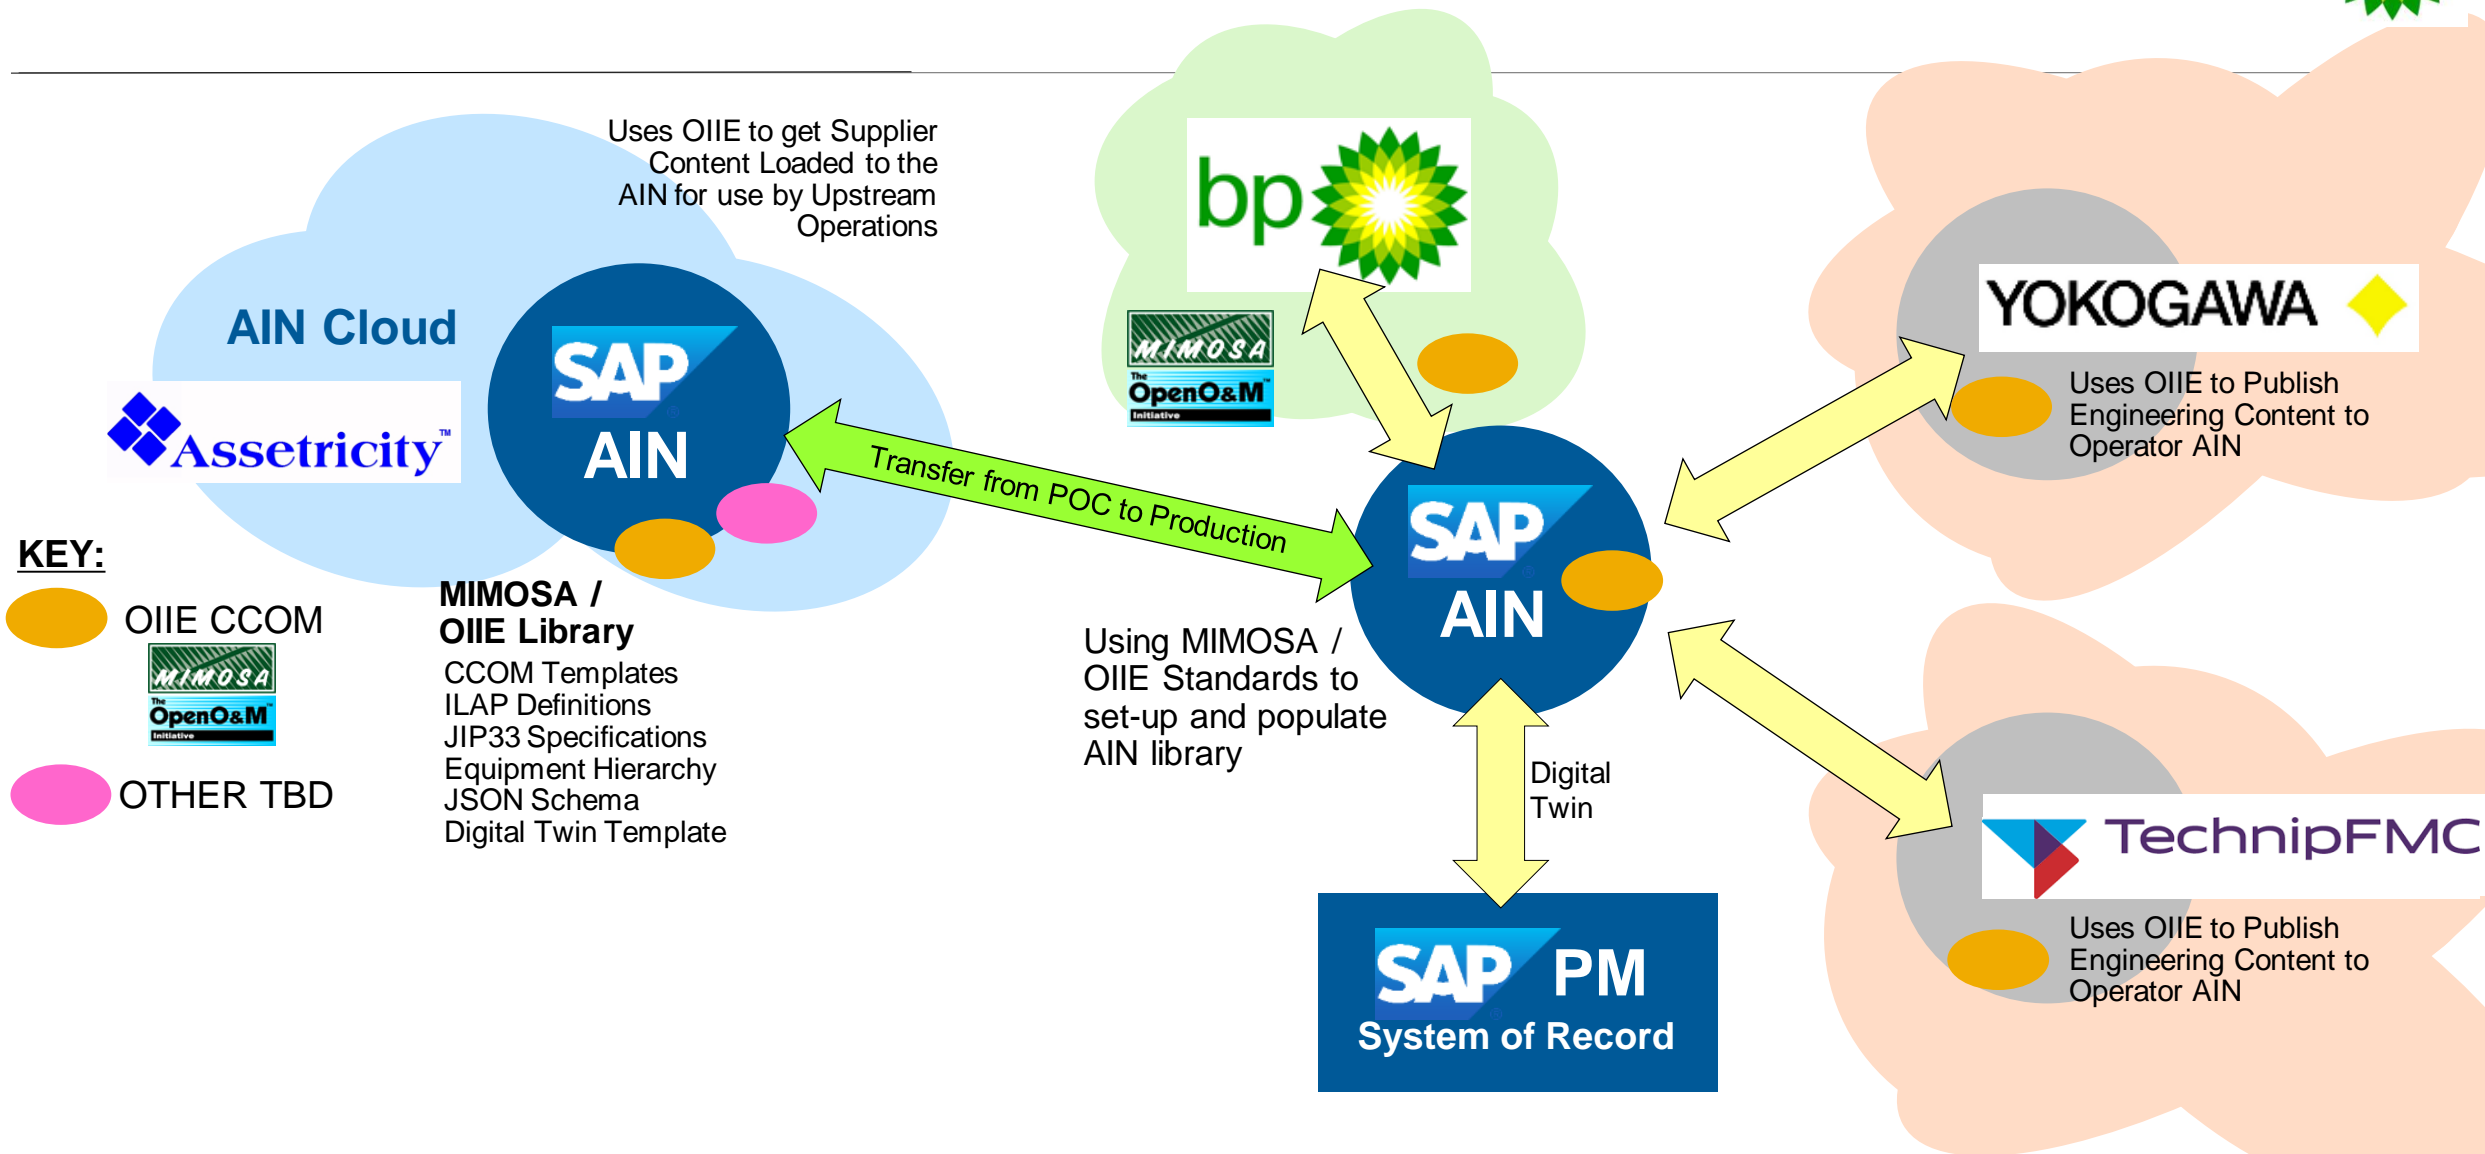

**KEY:**

- OIIE CCOM
- OTHER TBD

# Enabling: OIIE Production Using the AIN for Interoperability

**Any Questions?**

**Thank you!**

# Systems of Systems and Individual Enterprise Ecosystems Must Interoperate In Digital Business Ecosystems

The Open Industrial Interoperability Ecosystem (OIIE) defines the basis for Supplier-Neutral Digital Business Ecosystems composed of Enterprise Ecosystems which share the required standards.

## OIIE Features

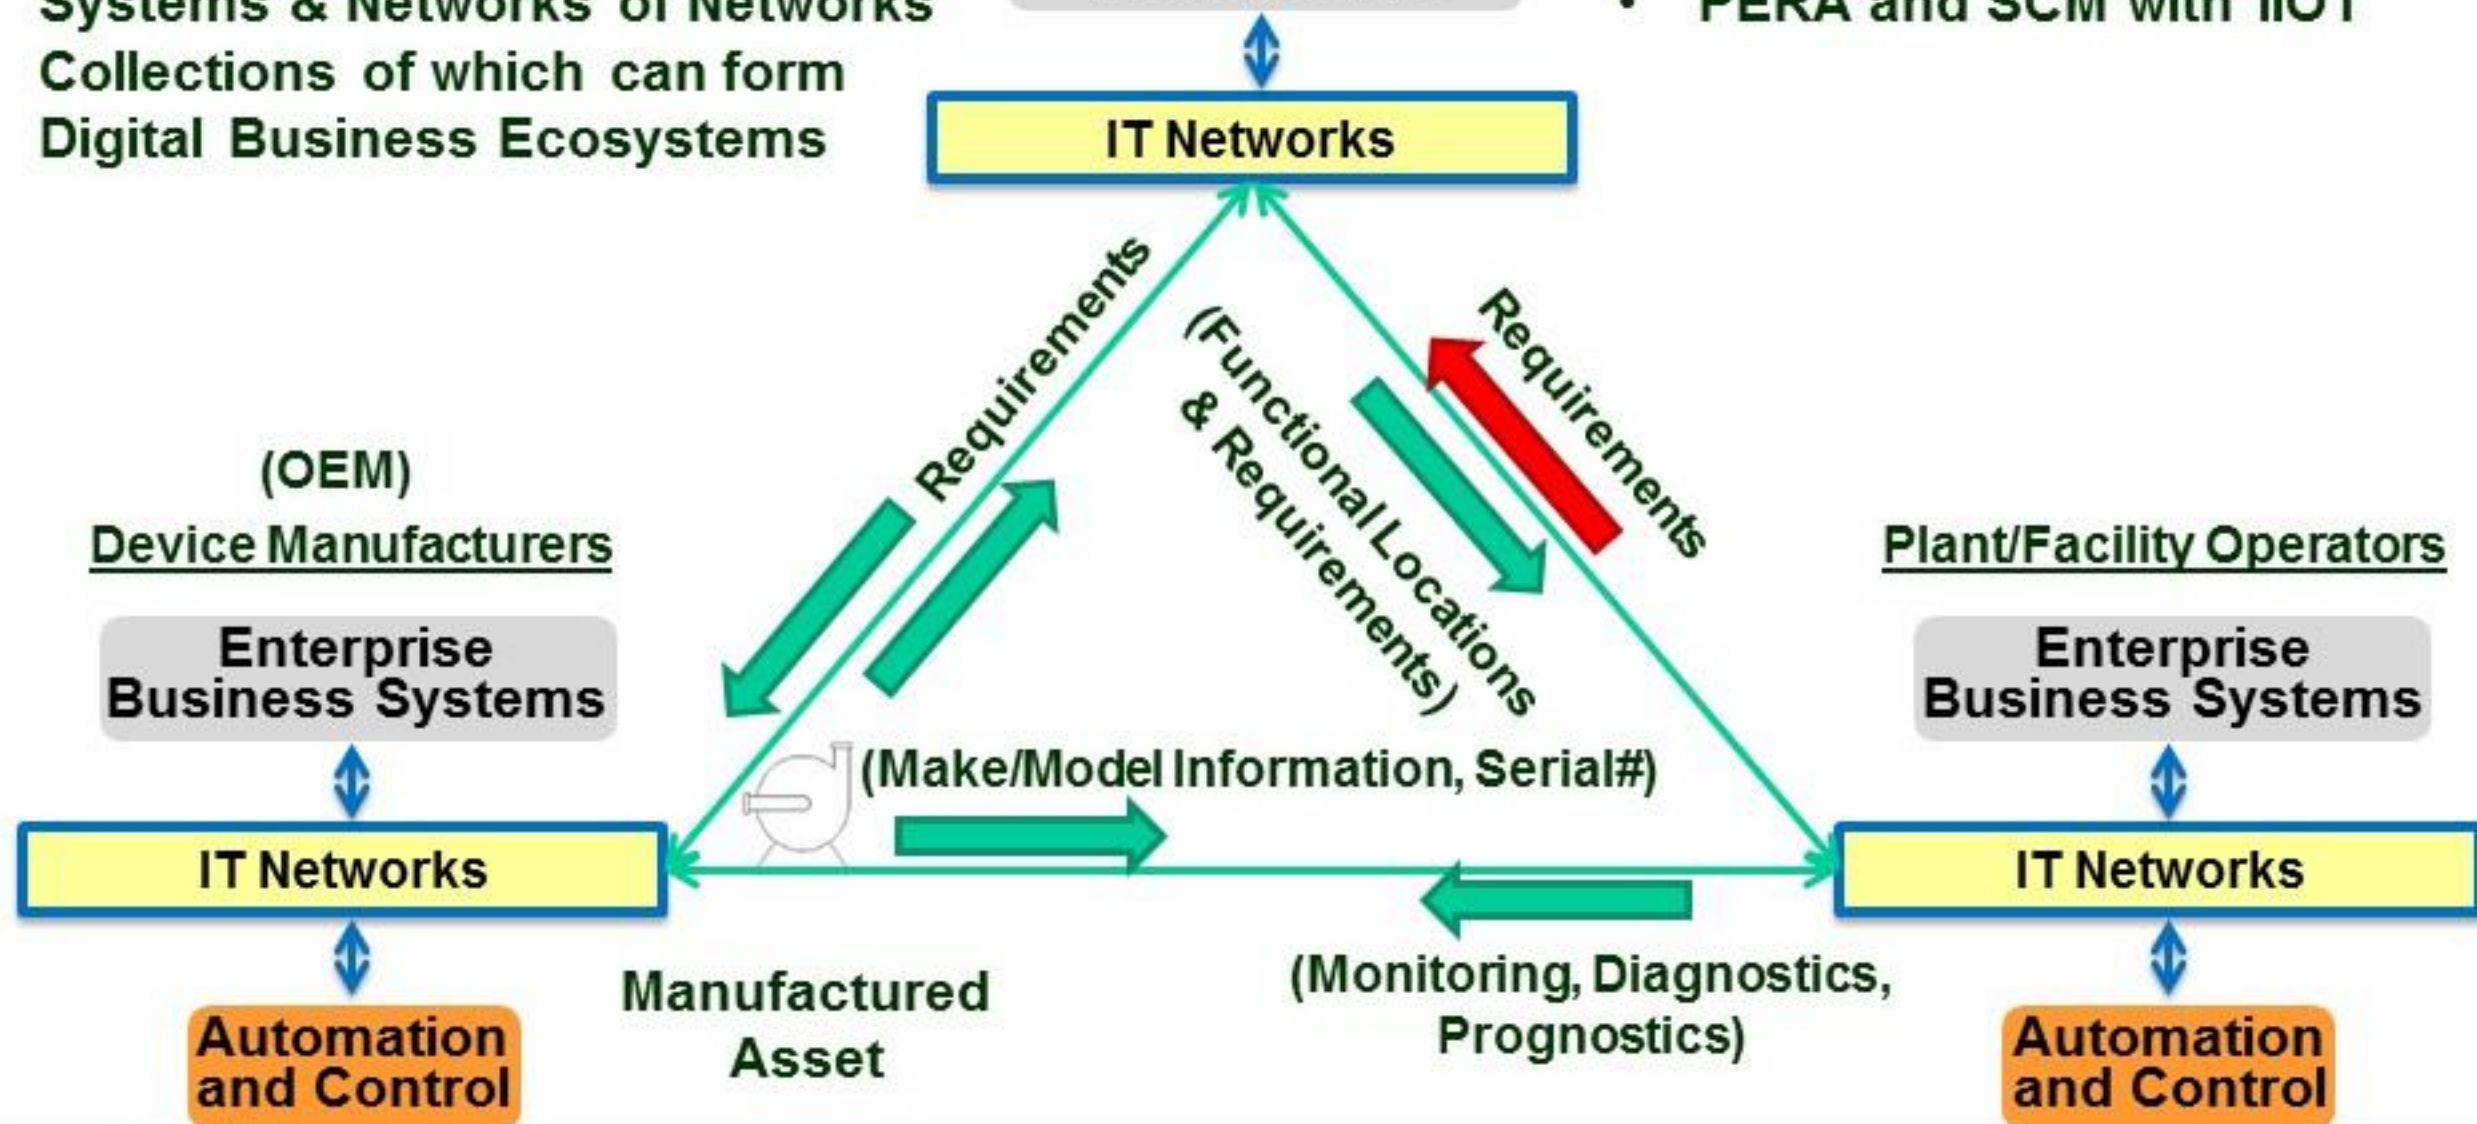

- Supplier-Neutral Systems of Systems & Networks of Networks
- Collections of which can form Digital Business Ecosystems

## EPC Firms

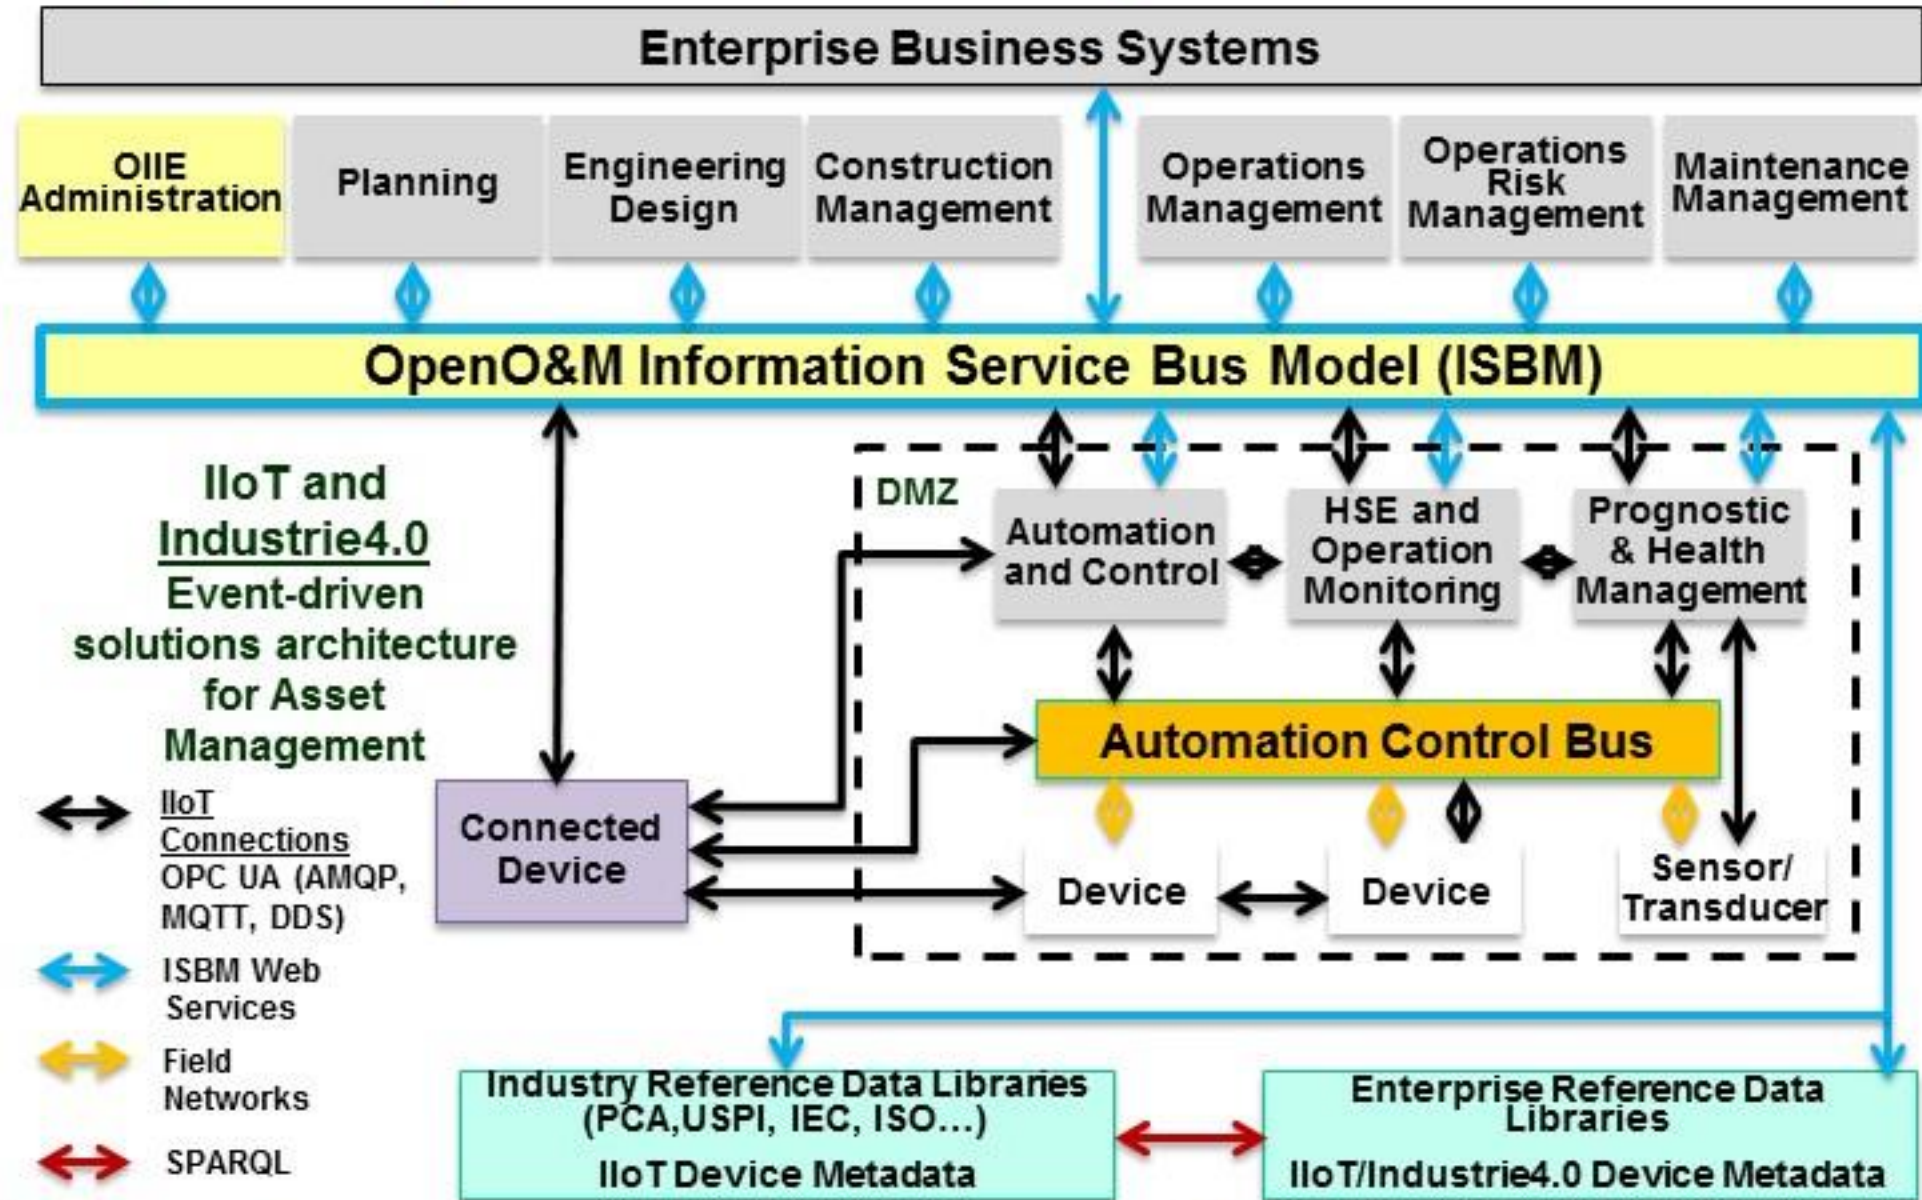

Engineering and Construction

## OIIE Includes

- Industry 4.0 Workflows
- PERA and SCM with IIOT

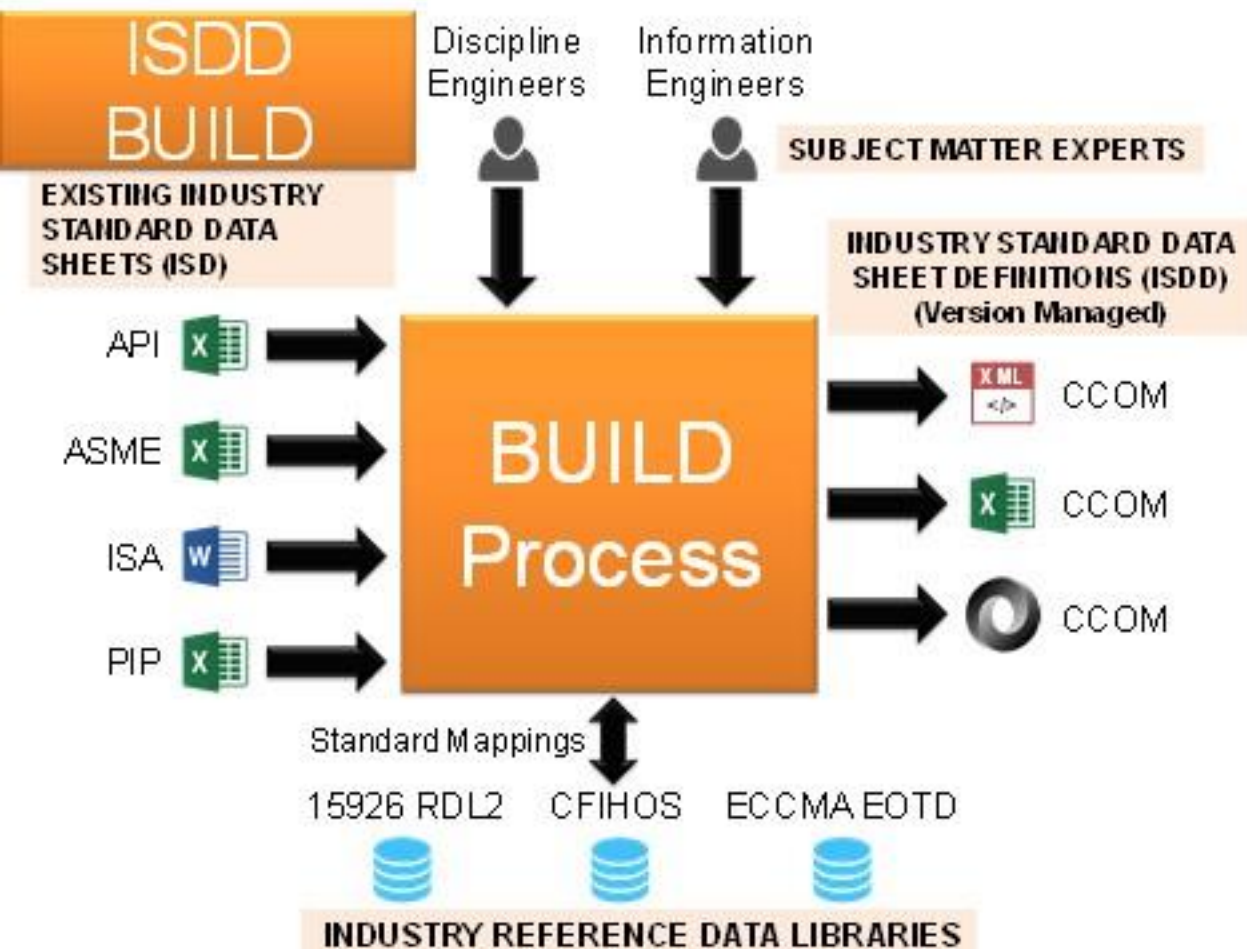

# OIE Simplified Systems Connectivity and Services Architecture

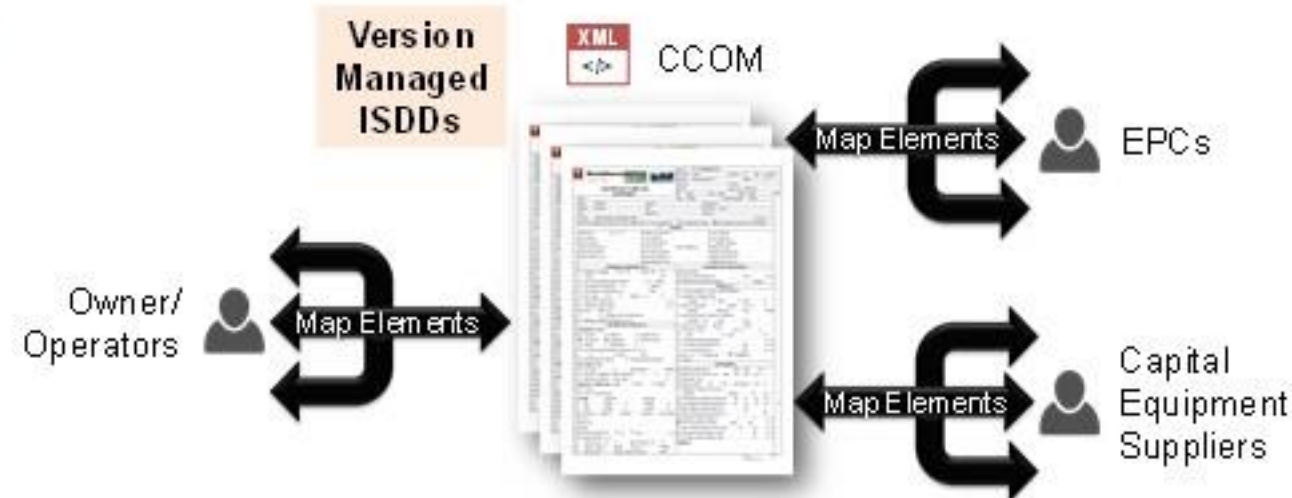

# ISDD Project Build and Use Processes

## ISDD USE

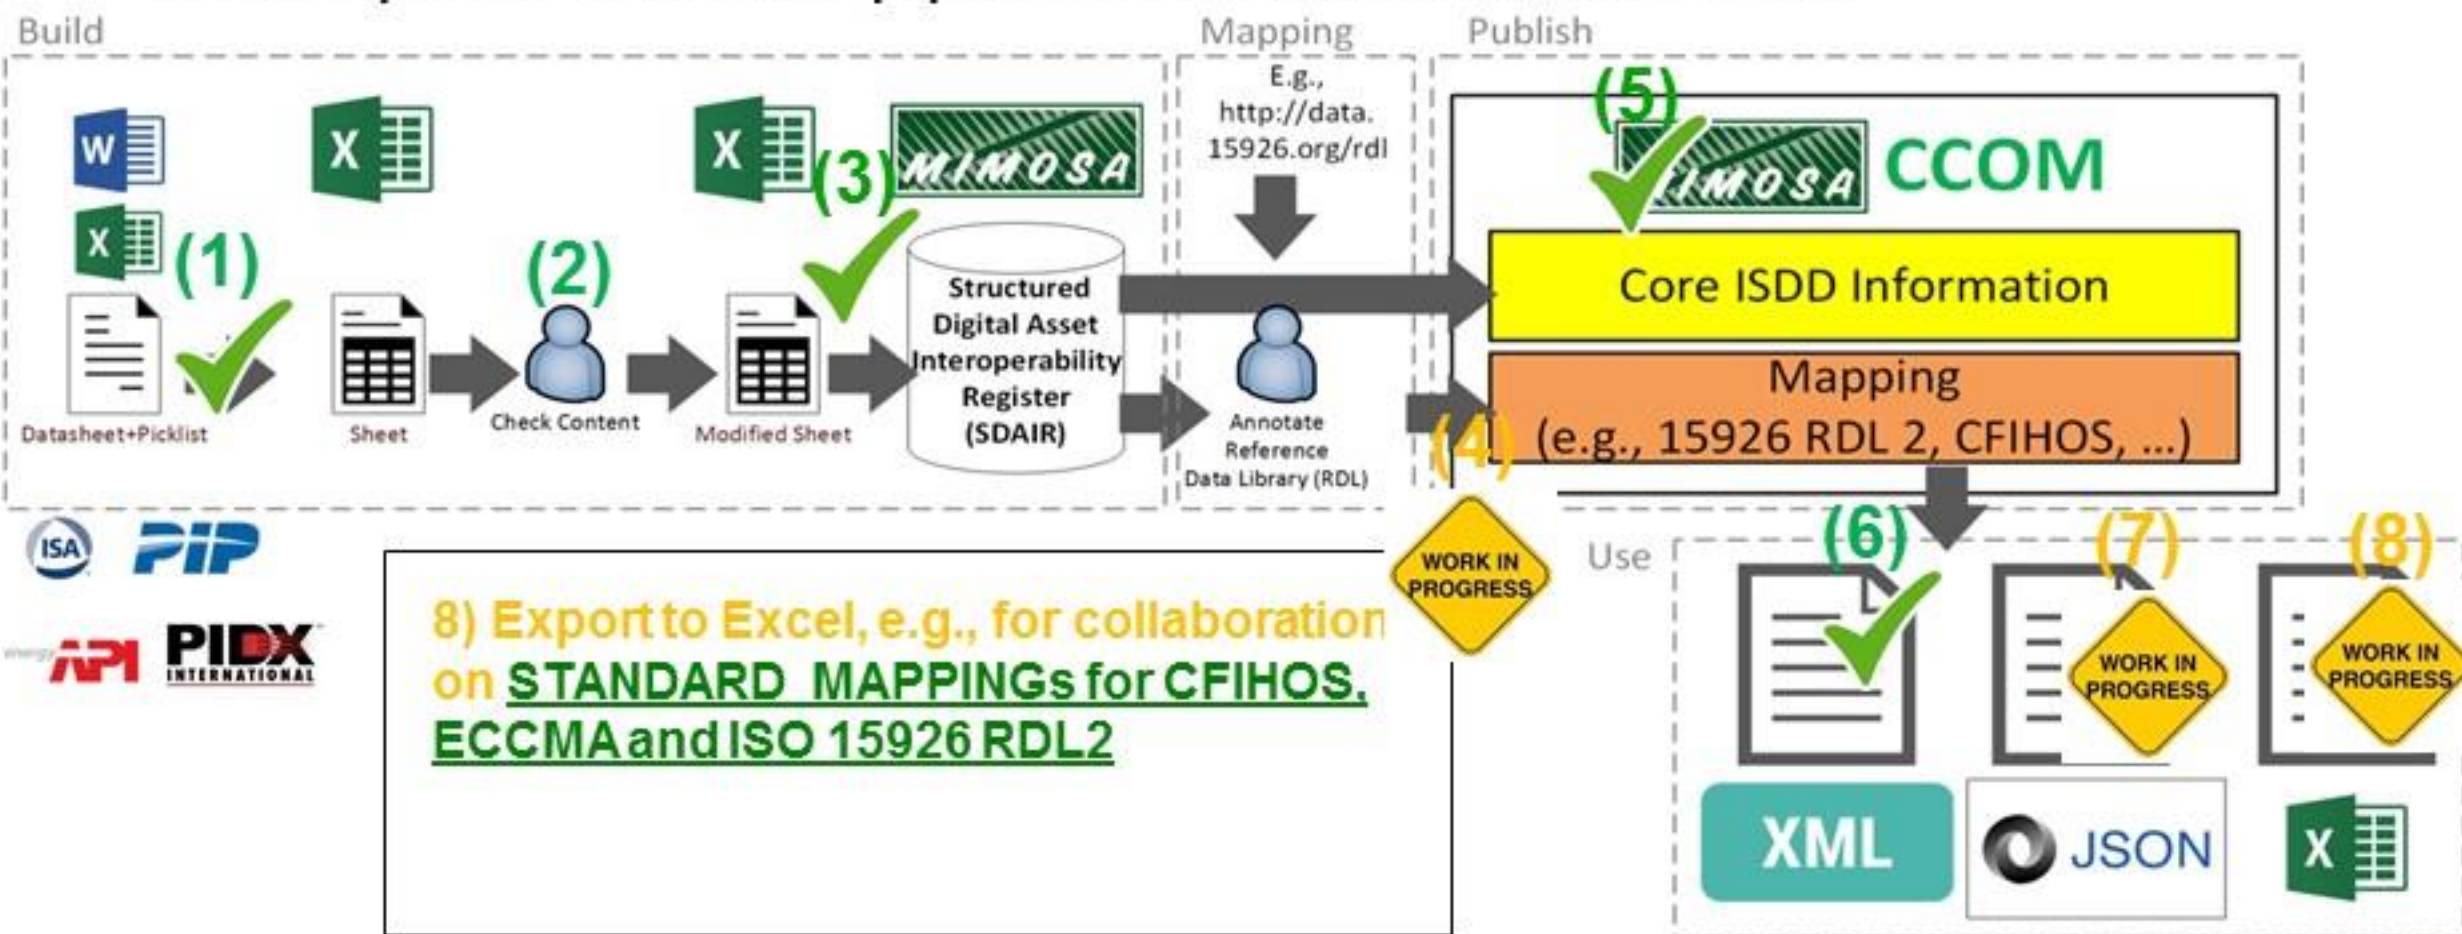

### An Industry Rosetta Stone

Custom Mappings which enable normalization for property sets "on the wire" in M2M exchanges

# Prototype ISDD Status

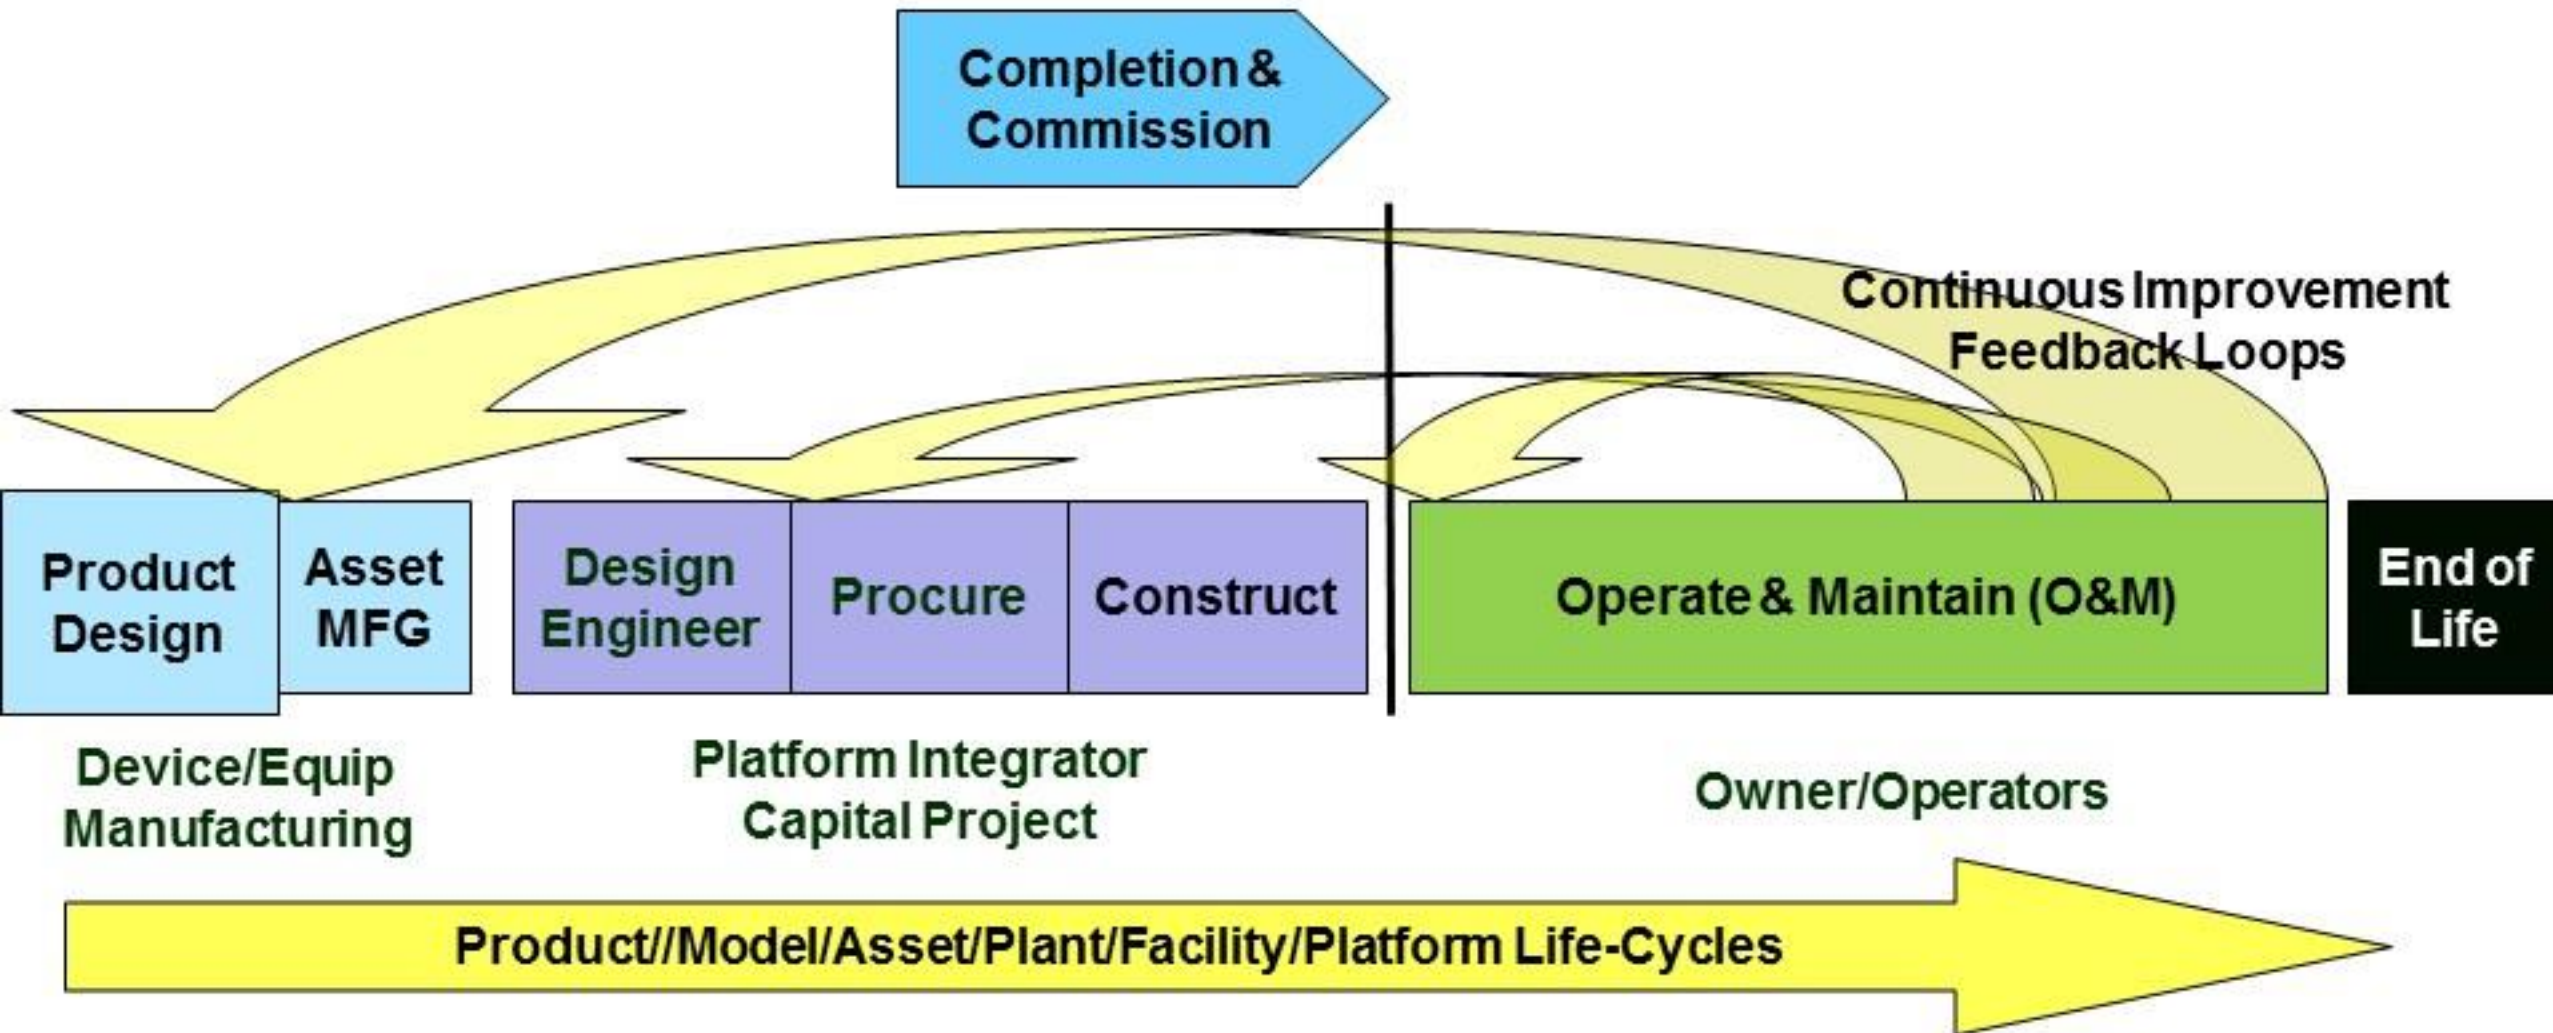

- Developed a workflow/pipeline to increase automation

# Full Asset Life-cycle Management

Physical and Digital Asset are included in OIIE

# Key OIIE Industry Use Cases Cover the Lifecycle of the Asset
